Due to the volume and fluidity of population movements in Cabo Delgado, IOM's Displacement Tracking Matrix (DTM) rolled out its Emergency Tracking Tool (ETT) methodology in key areas presenting rapid and important movements of populations, in order to ensure the tracking of population on the move and to identify areas of displacement, returns and settlements, and support the identification of critical needs.

From 27 June to 8 of July DTM teams in Quissanga, Palma, Nangade, Mocimboa da Praia, Muidumbe, Meluco and Ibo districts have recorded a significant number of individuals returning to their places of origin. An estimated 12,849 individuals have returned in their localities of origin. Reported returnees are moving spontaneously by bus and small boats. Reports indicate that all assessed individuals were displaced more than once prior to present return movement.

- DATE OF MOVEMENTS:** 27 June - 08 July 2022
- LOCATION:** Quissanga, Palma, Nangade, Mocimboa da Praia, Muidumbe, Meluco and Ibo
- REASON FOR MOVEMENT:** Intended Return, to join with family
- MEANS OF RETURN:** Bus and boat

Urgent Needs

1st most urgent need

Food

2nd most urgent need

Shelter

3rd most urgent need

NFI

Top needs are calculated by weighting the total number of IDP returns in each group against the stated priority needs.
