

EMERGENCY EVENT TRACKING

Data collection: 27 July 2022

Flooding

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round Four), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

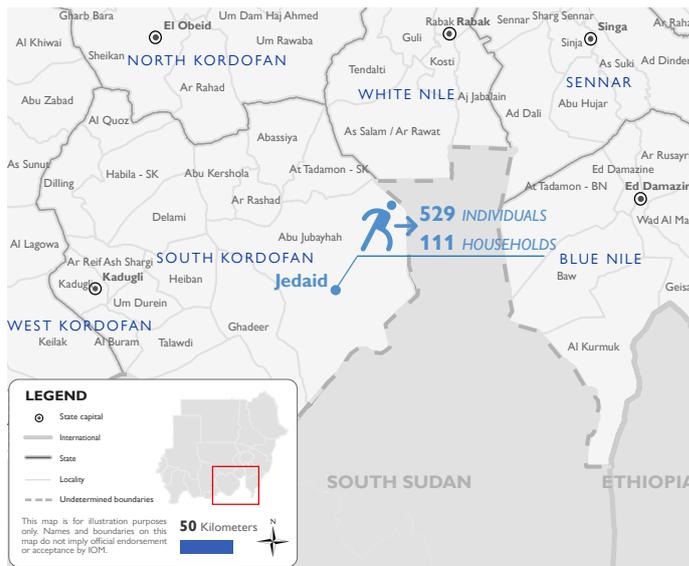

529

IDP individuals

111

IDP households

DTM teams activated EET to monitor the displacement of individuals affected by heavy rains and flooding on 23 July 2022 in Jedaid Village in Abu Jubayhah locality, South Kordofan. The first EET estimates that a total of 529 individuals (111 households) are currently seeking refuge in gathering sites and informal settlements around Jedaid village – with the entire IDP caseload (100%) being originally displaced from locations across the same village.

DTM field teams have confirmed that no individuals were killed, no individuals sustained injuries, and there are a total of 19 reported cases of lost goods, livestock, and/or cattle. All displaced individuals are Sudanese nationals. At least 41 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 79 persons with disabilities among the IDP caseload.* Consistent with the previous update, and based on a ranking scale, the three priority needs across the caseload are Emergency Shelter, Food, and Non-Food Items.

Return Intention

Data collected through the return intention indicator estimates that 529 individuals (100%) intend to return to their locations of origin upon improvement of the living situation.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

*DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).
