## DISPLACEMENT TRACKING MATRIX NIGERIA NORTH-EAST ZONE

## FLASH REPORT—WINDSTORM AND RAINSTORM YOBE STATE

08 August 2022

458 Affected households

2,772 Affected Individuals

13 sites

619 Damaged/Flooded shelters

351 Damaged toilets

240 Damaged shower points

### OVERVIEW

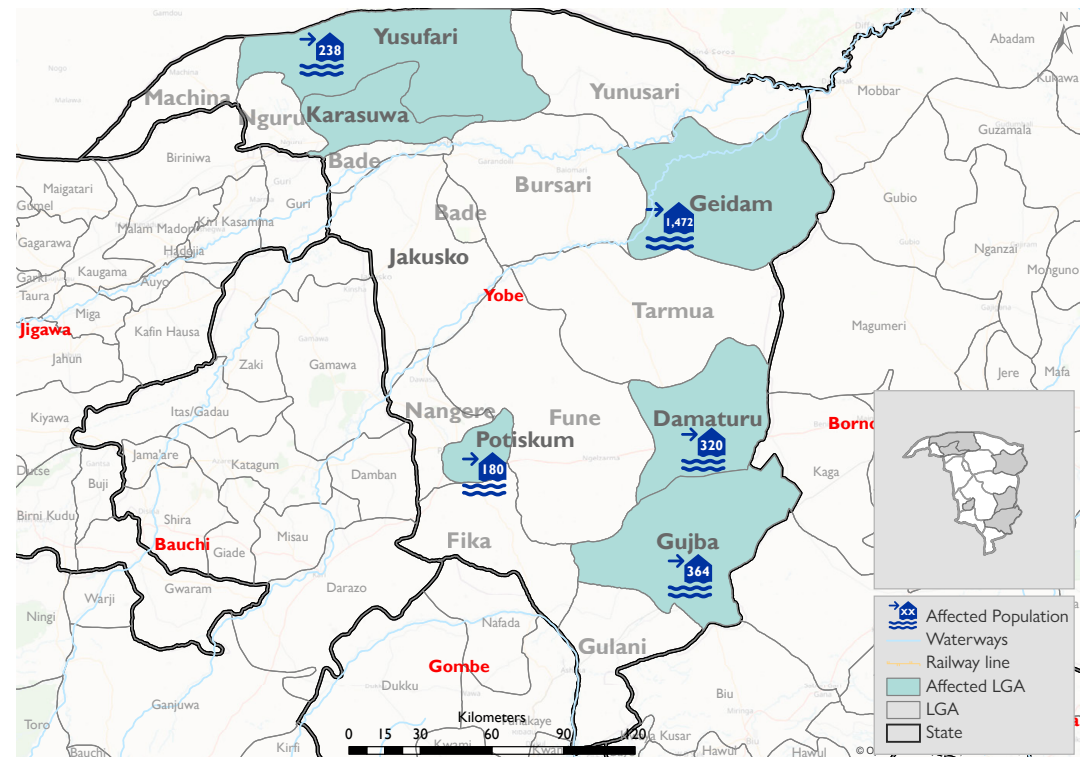

With the onset of the rainy season in Nigeria’s northeastern state of Yobe, varying degrees of damages have been reported in camps, camp-like settings and host communities. Heavy rainfalls, accompanied by strong winds have caused serious damages to IDP shelters and camp infrastructures.

Between 02 and 07 August 2022, IOM’s DTM programme carried out assessments to ascertain the level of damage sustained in IDP sites due to heavy windstorms and rainfall. Overall, 13 host community locations in Damaturu, Potiskum, Bursari, Karasawa, Gujba, Yusufari and Geidam LGAs were assessed. The worst-hit of the assessed sites was Anguwar Area, a host community in Asheikri ward of Geidam LGA, where a heavy rainstorm with floods damaged 78 shelters, affecting an estimated 507 individuals.

In total, 619 shelters were either damaged or flooded by storms, leaving a total of 458 households in immediate need of shelter. There were no casualties reported as a result of the storms.

### NEEDS

There is a major need of shelter, WASH and shelter repair kits as most shelters need re-enforcement. As a preventive measure against flooding, most IDP sites need good drainage systems and the use of sand bags to channel the water flow.

The maps in this report are for illustration purposes only. The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM
