

423 IDP HHs

496% increase in displacement from the previous week (71 HHs)

8 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 7 and 13 August 2022, IOM Yemen DTM tracked 423 households (2,538 individuals)<sup>2</sup> who experienced displacement at least once. Heavy rain and flood affected more than 9,441 HHs during the reporting period in 19 locations in Marib district and in 4 locations in Marib City.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 87 per cent (367 HHs) of the total, accounting for 9 per cent (40 HHs) displaced due to the neutral disaster concerns, and followed by economic reasons related to conflict, accounting for 4 per cent (16 HHs).

Between 1 January to 13 August 2022, IOM Yemen DTM tracked 8,151 households (HH)<sup>3</sup> (48,906 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern with exception of a significant increase this week.

1. Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.

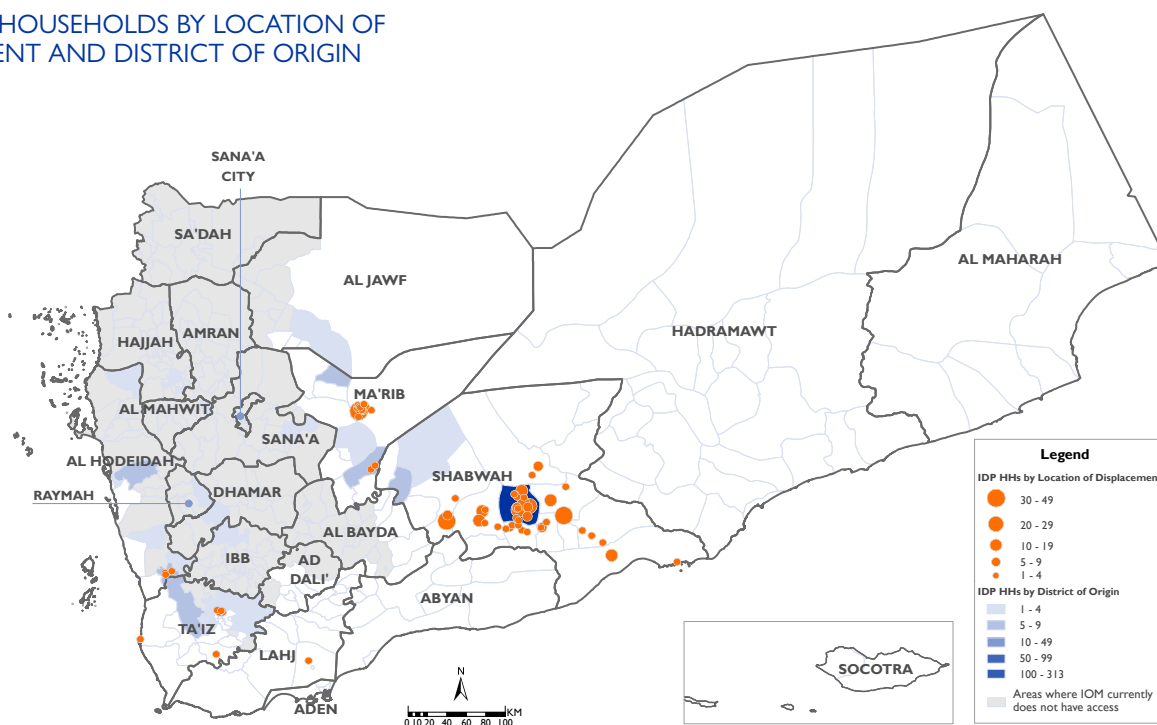

2. IOM DTM estimates that one household represents six individuals.

3. Please note that further additions to previous reporting periods can be reflected in cumulative totals without being individually addressed in narrative reports.
