

EMERGENCY EVENT TRACKING

Data collection: 7 August 2022

Conflict

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round Four), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

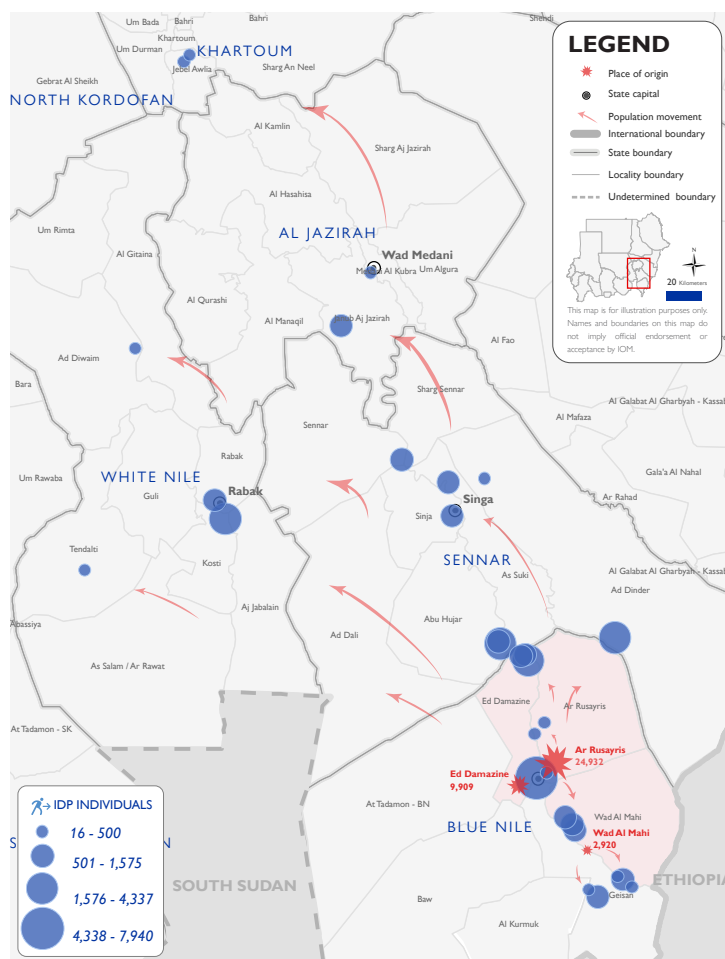

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal violence across Blue Nile state. On 13 July 2022, inter-communal clashes erupted between members of the Hausa Tribe and the Hamaj and Barta tribes in Gabal Hamad and Village 7 in Wad Al Mahi locality, Blue Nile state, following the death of two individuals from the Hamaj tribe. Between 14 and 16 July 2022, inter-communal violence continued across several villages in Ar Rusayris locality, Blue Nile state. For more information, please see [EET Ar Rusayris, Blue Nile \(Update 004\)](#).

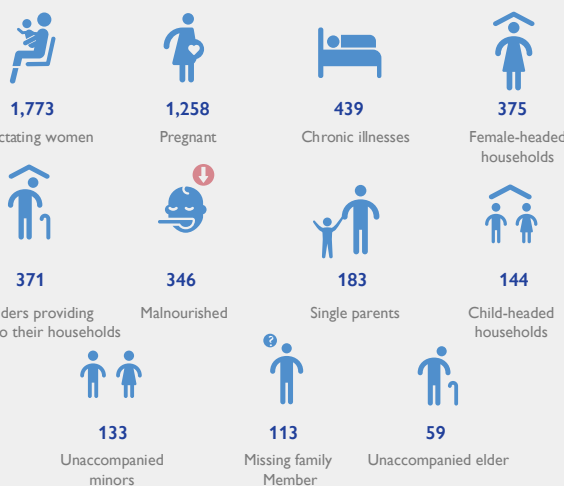

The fifth EET update estimates that a total number of 37,761 individuals (6,184 households) are currently seeking shelter in Blue Nile (49%), Sennar (34%), White Nile (13%), Al Jazirah (3%), and Khartoum (1%) states. The IDP caseload was originally displaced from locations across Ar Rusayris (66%), Ed Damazine (26%), and Wad Al Mahi (8%) localities across Blue Nile state. The mobility among the IDP caseload continues to be high across mentioned localities. The situation remains fluid, with locations and figures of displacement subject to change with variations in the future. Any changes will be reflected throughout future updates.

DTM Sudan has tracked the displacement of multiple communities affected by the conflict across Blue Nile state. DTM Sudan estimates a total of 18,541 IDPs displaced across 27 locations in Blue Nile state. Field teams have highlighted 18 locations as the primary destination for IDPs of Hausa origin. These locations are spread around Ed Damazine, Ar Rusayris, and Wad Al Mahi, and together host 14,571 IDPs. This figure includes 4,925 individuals from the IDP caseload which are currently seek shelter in eight schools across Ed Damazine Town, in Ed Damazine locality. Furthermore, field teams have highlighted 9 locations as the primary destination of IDPs for non-Hausa communities. These locations are located across Geisan, Ar Rusayris, and Ed Damazine localities and together host an estimated 3,970 IDPs. IDPs within these locations are predominantly of Fallata, Berta, Hamaj, and Ragareeg origin. The IDP caseload in the remaining states are predominantly of Hausa origin.

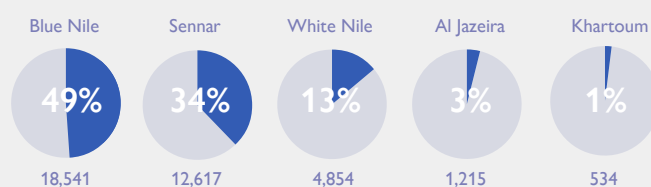

Upon reverification, and in triangulation with other sources, DTM field teams indicate that at least 182 individuals were killed with a further 414 individuals sustaining injuries, and a total of 6,490 reported cases of lost goods, livestock, and/or cattle. All displaced individuals are Sudanese nationals. At least 5,194 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 5,664 persons with disabilities among the IDP caseload.* Based on a ranking scale, and the three priority needs across the caseload are Food, Emergency Shelter, Non-Food Items.

Vulnerabilities

IDP Caseload

*DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PWD).

Return Intention

Data collected through the return intention indicator estimates that 32,830 IDPs (87%) intend to remain in their current locations, and 2,967 IDPs (8%) intend to return to their locations of origin upon improvement of the security situation. An estimated 1,964 IDPs (5%) intend to move to a third location – with key informants indicating that possible locations include localities across Sennar and White Nile states.
