8 Returnee HHs

35% decrease in displacement from the previous week (97 HHs)

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 21 and 27 August 2022, IOM Yemen DTM tracked 63 households (378 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 86 per cent (54 HHs) of the total, accounting for nine per cent (6 HHs) displaced due to the economic reasons related to conflict, and followed by neutral disaster concerns, accounting for five per cent (3 HHs).

Between 1 January to 27 August 2022, IOM Yemen DTM tracked 8,496 households (HH)³ (50,976 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern.

In addition to recording (8 HHs) returnees in the governorates of Shabwah (3HHs), (3HHs) in Marib and (2 HHs) in Al Hodeidah returning to their locations of origin during the reporting period after improved the security situation.
