

Flooded areas in Imburu, Numan LGA

Flooded areas in Imburu, Numan LGA

Flooded areas in Anguwan Maikano, Shelleng LGA

OVERVIEW

With the onset of the rainy season in Nigeria's northeastern state of Adamawa, varying degrees of damages have been reported in communities in the LGAs Shelleng and Numan. Heavy rainfalls, accompanied by strong winds have caused flooding that has led to serious damages to shelters and infrastructures.

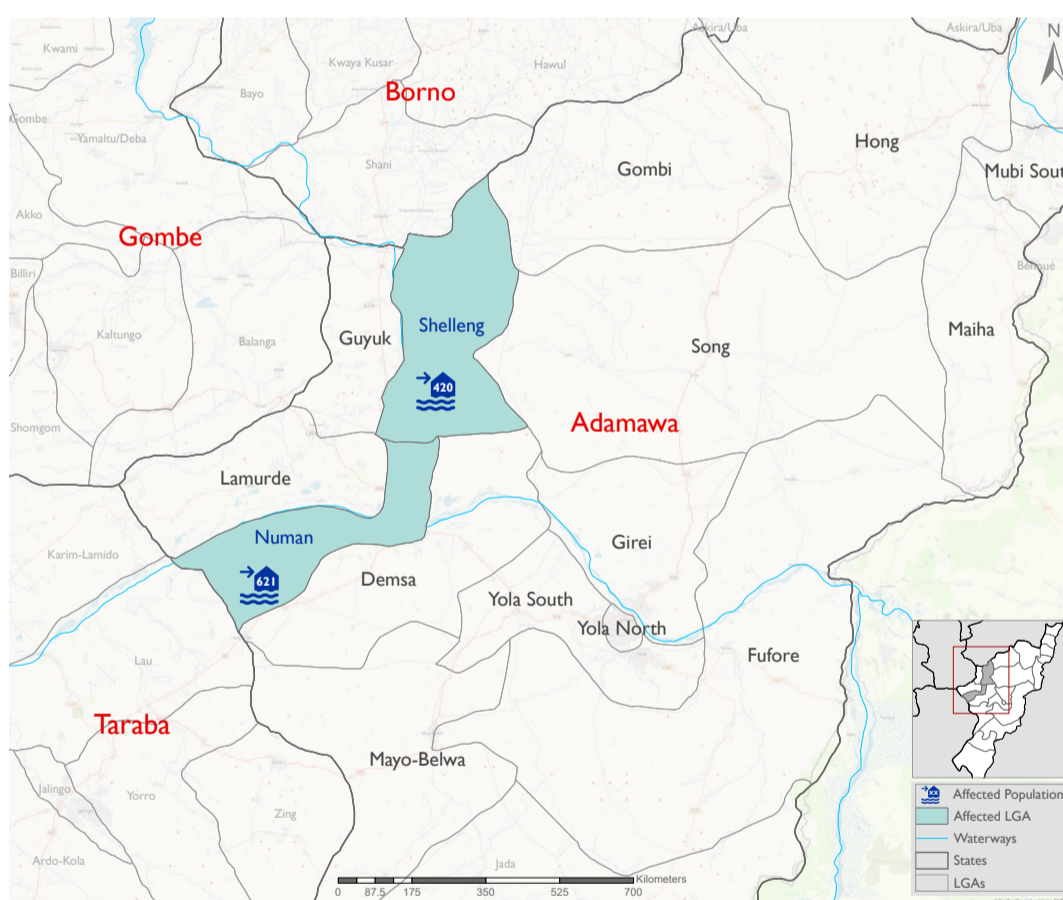

Between 16 and 22 August 2022, IOM's DTM programme carried out assessments to ascertain the level of damage sustained in these sites due to heavy windstorms and rainfall. Overall, two communities in Numan and Shelleng LGAs were assessed. The worst-hit of the assessed sites was Imburu, a community in Imburu ward of Numan LGA, where a heavy rainstorm with floods damaged 63 shelters, affecting an estimated 621 individuals.

In total, 133 shelters were either damaged or flooded by storms, leaving a total of 179 households in immediate need of shelter. Ten (10) casualties were reported as a result of the Flood.

NEEDS

There is a major need of shelter repair kits, WASH and NFI assistance as most shelters need re-enforcement. As a preventive measure against flooding, most communities need a good drainage system to channel water flow.

AFFECTED LOCATIONS

The maps in this report are for illustration purposes only. The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM

LGA	Ward	Site Type	Site Name	Cause of Incident	No. of Affected Households	No. of Affected Individuals	Male	Female	Children	Casualties	No. of Damaged Shelters
Numan	Imburu	Host Communities	Imburu	Flood	109	621	248	332	210	0	63
Shelleng	Shelleng	Host Communities	Anguwan Maikano	Flood	70	420	176	224	194	10	70
Grand Total					179	1,041	424	556	404	10	133
