

OVERVIEW

With the onset of the rainy season in Nigeria's northeastern state of Yobe, varying degrees of damages have been reported in host communities of Tarmua and Damaturu LGAs. Heavy rainfalls, accompanied by strong winds have caused serious damages to shelters and infrastructures.

Between 08 and 14 August 2022, IOM's DTM programme carried out assessments to ascertain the level of damage sustained in IDP sites due to heavy windstorms and rainfall. Overall, 7 host community locations in Damaturu and Tarmua LGAs were assessed. The worst-hit of the assessed sites was Kandahar Area, a host community in Nayinawa ward of Geidam LGA, where a heavy rainstorm with floods damaged 51 shelters, affecting an estimated 245 individuals.

In total, 209 shelters were either damaged or flooded by storms, leaving a total of 556 households in immediate need of shelter. Six (6) casualties were reported as a result of the heavy rainfall.

NEEDS

There is a major need of shelter repair kits, WASH and NFI assistance as most shelters need re-enforcement. As a preventive measure against flooding, most IDP sites need good drainage systems and the use of sand bags to channel the water flow.

AFFECTED LOCATIONS

The maps in this report are for illustration purposes only. The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM

LGA	Ward	Site Type	Site Name	Cause of incident	No. of Affected Households	No. of Affected Individuals	Male	Female	Children	Casualties	No. of Damaged Shelters
Damaturu	Njiwal/Gwange	Host Community	Pompomari Jammaina	Floods	165	825	196	257	372	0	26
