IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 4 and 10 September 2022, IOM Yemen DTM tracked 51 households (306 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 90 per cent (46 HHs) of the total and followed by economic reasons related to conflict, accounting for 10 per cent (5 HHs).

From 1 January to 10 September 2022, IOM Yemen DTM tracked 8,722 households (HH)³ (52,332 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern.

IOM DTM also recorded 52 returnee households in the governorates of Shabwah (49 HHs) and Marib (3 HHs) returning to their locations of origin during the reporting period due to an improved security situation.

4. New arrivals recorded by IOM DTM within the reporting period. This does not necessarily represent the exact total increase of HHs due to an unknown number of instances of multiple displacements and/or return.

1. Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.

2. IOM DTM estimates that one household represents six individuals.

3. Please note that further additions to previous reporting periods can be reflected in cumulative totals without being individually addressed in narrative reports.
