EMERGENCY EVENT TRACKING | Data collection: 14 September 2022
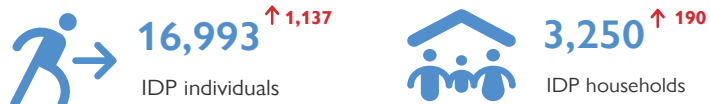

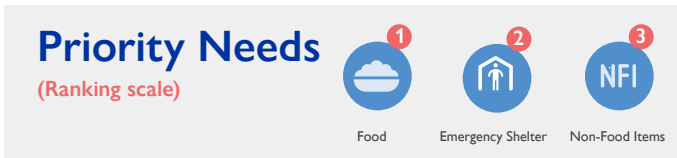

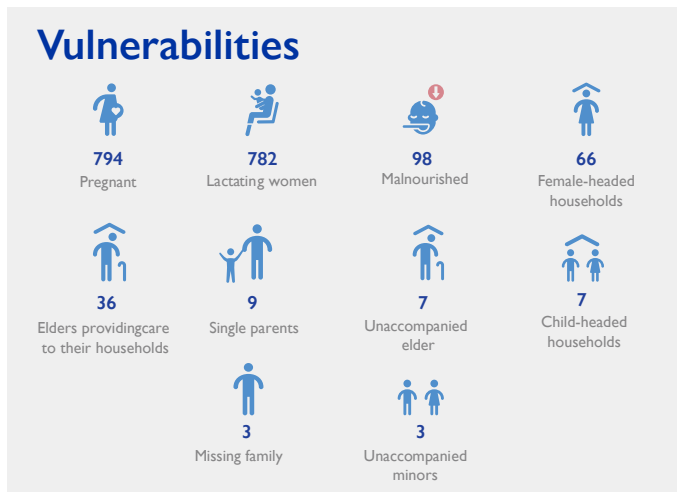

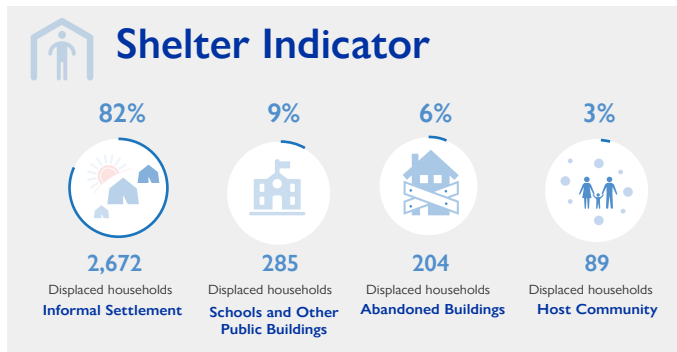

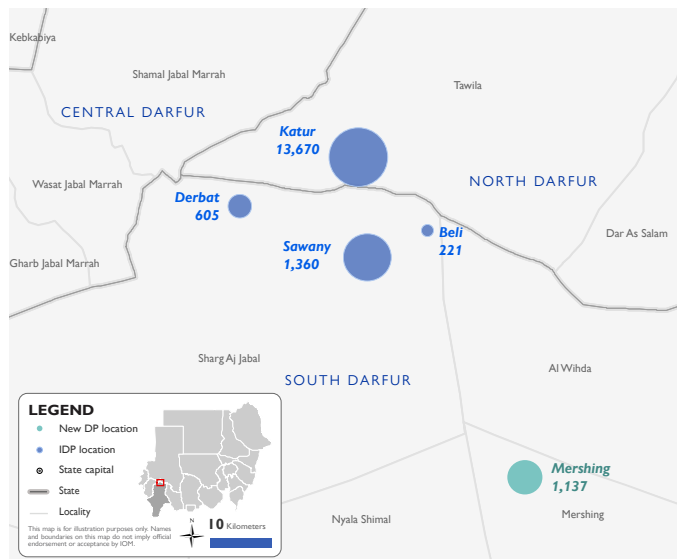

Conflict

As a subcomponent of the Mobility Tracking methodology (Round Four), the Emergency Event Tracking (EET) tool is deployed to track sudden displacement, provide more frequent updates on the scale of displacement, and quantify the affected population when needed.

Event Overview

16,993 ↑1,137
IDP individuals
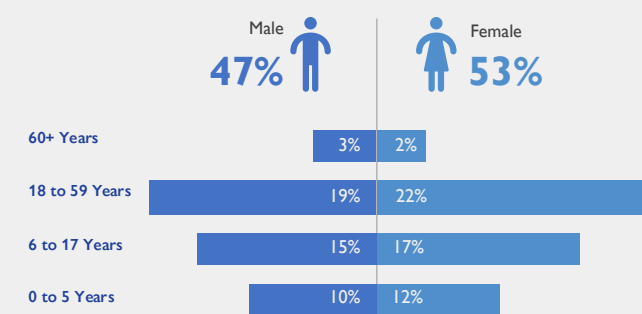

3,250 ↑190
IDP households

DTM Teams activated EET to monitor displacement resulting from clashes erupting between two factions of the Sudanese Liberation Army in Sharg Aj Jabal, South Darfur on 27 June 2022 over an issue of land ownership. For more information, please see Sharg Al Jabal (Mora), South Darfur (Update 001). The second EET update estimates a total number of 16,993 IDPs individuals (3,250 households) currently seeking shelter in Katur village (80%), Tawila locality, North Darfur, and Sawany (8%), Mershing (7%), Derbat/Korrnay (4%), and Beli (1%) villages in Sharg Al Jabal locality, South Darfur. Field teams report that the IDP caseload identified was originally displaced from 28 villages across Sharg Aj Jabal locality (82%), as well as seven villages across Tawila locality (14%), and Mora village in Um Dafoug locality (4%).

Field teams report that the increase in the IDP caseload from the previous update can be attributed to additional gathering sites visited by field teams, and not to an escalation in the conflict. Additionally, field teams indicate that after receiving Non-Food Items from the humanitarian community on 9 August 2022, many IDPs who had been residing in schools have now sought shelter in informal open area settlements in the surrounding areas.

DTM field teams have confirmed that at least 13 individuals were killed, three individuals sustaining injuries, and a total of 1,787 individuals report lost goods, livestock, and/or cattle. All displaced individuals are Sudanese nationals. At least 1,805 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 2,549 persons with disabilities among the IDP caseload.* Based on a ranking scale, the three priority needs across the caseload are Food, Emergency Shelter, Non-Food Items.

2 Emergency Shelter
3 Non-Food Items

Return Intention

Data collected through the return intention indicator estimates that the 16,772 IDPs (99%) of the IDP caseload intend to return to their location of origin upon improvement of the security situation, with the remaining 221 IDPs (1%) intending to remain in their current locations.

*DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).
