

Al Lagowa (Al Lagowa Town), West Kordofan UPDATE 2: 1 NOVEMBER 2022

EMERGENCY EVENT TRACKING Data collection: 30 October 2022

LEGEND IDP location

As a subcomponent of the Mobility Tracking methodology (Round Four), the Emergency Event Tracking (EET) tool is deployed to track sudden displacement, provide more frequent updates on the scale of displacement, and quantify the affected population when needed.

Event Overview

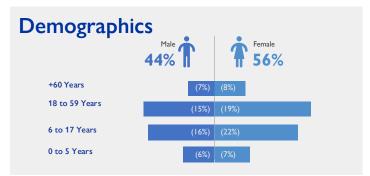

DTM Sudan activated EET to monitor the displacement of individuals affected by inter-communal violence between the Misseriya and Nuba tribes in Al Lagowa locality, West kordofan following a dispute over land ownership. Violence spread to Al Lagowa Town on 14 and 15 October 2022, and escalated again on 18 October 2022. For more information, please see EET Update 001.

The second update estimates that there are currently 20,884 IDPs (3,449 households) displaced to 25 locations across Al Lagowa (47%) and Keilak (4%) localities in West Kordofan, Kadugli (29%) and Dilling (15%) localities in South Kordofan, and Sheikan (5%) locality in North Kordofan. The entire captured IDP caseload (100%) was originally displaced from Al Lagowa Town in Al Lagowa locality, West Kordofan.

In addition to this captured caseload, field teams also highlight that they have recieved unverified reports that approximately 3000 households have been displaced to the mountainous regions approximately 10km East of Al Lagowa Town in Al Lagowa locality. Field teams have been unable to reach these gathering sites given access and telecommunications restrictions put in place by local authorities. Furthermore, there are unverified reports that an additional estimated 600 households are travelling to Al Jazirah and Khartoum states. Field teams are currently preparing data collection exercises for an updated figure in the coming days, which is likely to reflect the presence of a larger IDP caseload. The displaced caseload in the villages immediately surrounding Al Lagowa Town is predominantly comprised of members from the Misseriya, Fallata, and Dajo tribes. Furthermore, field teams report that the displaced caseload in the mountainous regions approximately 10km East of Al Lagowa Town is predominantly comprised of members from the Nuba, Dago, Tulshi, and Kmad tribes.

DTM field teams estimate that, in triangulation with other sources, at least 58 individuals were killed with a further 89 injuries sustained since data collection procedures began. A total of 7,148 reported cases of lost goods, livestock, and/or cattle have been reported. All displaced individuals are Sudanese nationals. At least 2,766 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 3,123 persons with disabilities among the IDP caseload.* Consistent with the previous update, and based on a ranking scale, the three priority needs across the caseload are Food, Health (Medical Needs), and Emergency Shelter.

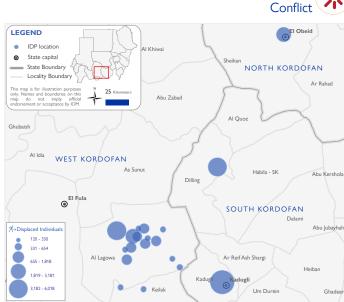

*DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).

Priority Needs

Return Intention

(Ranking scale)

(Medical needs)

Data for the Return Intention Indicator demonstrates that 16,872 IDPs (81%) intend to return to their locations of origin after the security situation improves. The remaining 4,012 IDPs (19%) intend to remain in their current locations of origin.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM).
