IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 27 November and 3 December 2022, IOM Yemen DTM tracked 62 households (372 individuals)<sup>2</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 66 per cent (41 HHs) of the total and followed by economic reasons related to conflict, accounting for 34 per cent (21 HHs).

From 1 January to 3 December 2022, IOM Yemen DTM tracked 9,690 households (HH)<sup>3</sup> (58,140 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern mainly from mid-August 2022.

IOM DTM also recorded two returnee households in the governorate of Al Bayda returning to their locations of origin during the reporting period due to an improved security situation.
