

This document is a compilation of data collected by IOM from Frontex as well as the Italian, Spanish, Greek and Maltese interior ministries on migratory movements from Africa to Europe between 2017 and 2022.

IOM works closely with a wide range of actors, including government and non-government partners, to collect and compile this data on a quarterly basis. This document presents the situation of migrant arrivals in Europe based on data for

2021 from the point of view of movements from West and Central Africa (WCA).

* Data for 2022 covers the period up to September 30, 2022 (January - September 2022). These data will be regularly updated in future publications. And is available on <https://migration.iom.int> and www.missingmigrants.iom.int. Some data on nationalities are only partially available.

ARRIVALS TO EUROPE

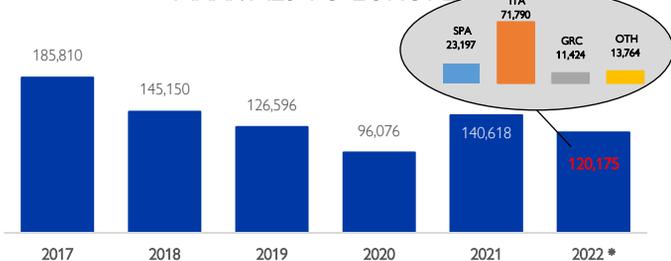

Fig.1 - Number of irregular migrant arrivals (by sea and land) to Europe, and share of migrants from West and Central Africa (2017-2022*)

NATIONALITIES

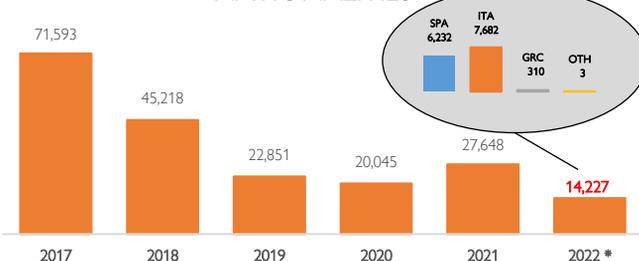

Fig.2 – Number of West and Central African nationals arrived irregularly in Europe (by sea and land), 2017-2022*

Arrivals to Europe (2017-2022*): Between 2017 and 2022, 824,425 migrants arrived irregularly in Italy, Spain, Greece, Malta and Cyprus by sea and land (Fig.1). Total number of arrivals in Europe decreased over the period of 2017–2022 and the main destinations vary from year to year. Of these arrivals, **an estimated 201,582 individuals (25 per cent) were nationals of countries in West and Central Africa** (Fig.2). Between January and September 2022, **14,227 nationals** from West and Central African countries arrived in Europe.

An increasingly important route to Europe crosses the Atlantic Ocean from African coasts to the Canary Islands (Spain). Large numbers of migrants have attempted to reach these islands since mid-2019. **In the first nine months of 2022, 12,506 migrants reached the Canary Islands aboard 279 boats, a slight drop from the 13,118 migrants who reached the islands aboard 340 boats during the same period in 2021 an increase of 5 per cent of migrants (612).**

Nationalities of West and Central African migrants: Using the known nationality data, **12 per cent** of irregular arrivals to Europe in 2022 (until September 2022) are from West and Central Africa nationals compared to **20 per cent** in 2021 (Fig.3). Of the West and Central African migrants irregularly arriving in Europe, the most common nationalities recorded were nationals from Guinea, Côte d'Ivoire, Nigeria and Mali. These four nationalities represent more than **52 per cent** of all irregular migrants arriving from West and Central Africa to Europe (Fig.4). However, most data from Spain for 2021-2022* is not disaggregated by nationality and only show a category called "Un-identified sub-Saharan" which skews this proportion. In 2022*, only **76 per cent** of arrivals to Europe have matching nationality data, the **22 per cent** remaining are unknown.

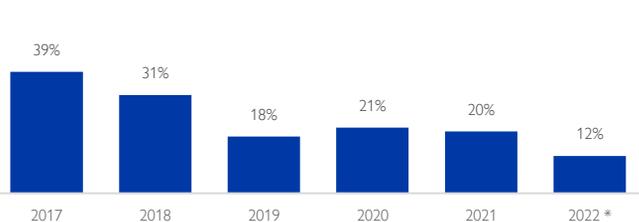

Fig.3 – Proportion of WCA nationals against all informed** irregular arrivals in Europe, 2017-2022*

Destination Countries: Migrants from West and Central Africa continue to predominantly favour Italy and Spain (Fig.5). Of the **14,227 nationals** from West and Central African countries who arrived in Europe in 2022*, **54 per cent (or 7,682 migrants) went to Italy, 44 per cent (or 6,232 migrants) to Spain, 2 per cent (or 310 migrants) to Greece and under 1 per cent (or 3 migrants) to Cyprus and Malta.**

Notably, the main destination countries of WCA arrivals varied according to nationality (Fig.6). Nationals from Mali and Senegal go to Spain preferably. Nationals of Côte d'Ivoire, Guinea, Ghana, Nigeria, Cameroon, The Gambia, favour Italy as their destination country. Nationals from Sierra Leone go to Greece preferably. However, the data is incomplete given the category "unidentified sub-Saharan" provided for arrivals in Spain.

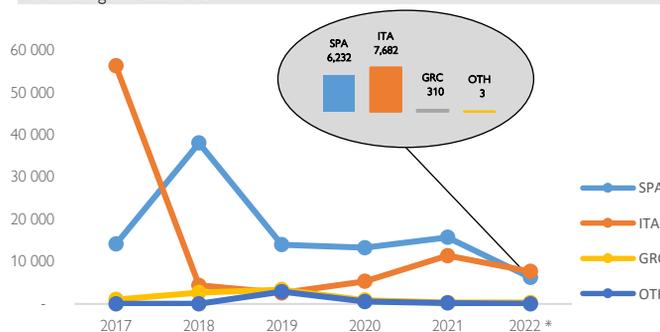

Fig.5 - Main destinations Countries for irregular migrant arrivals from West and Central Africa (2017-2022*)

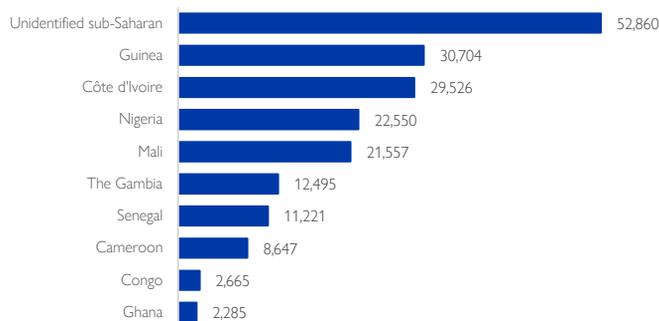

Fig.4 – Primary nationalities of irregular migrant arrivals from West or Central Africa in 2017 - 2022*

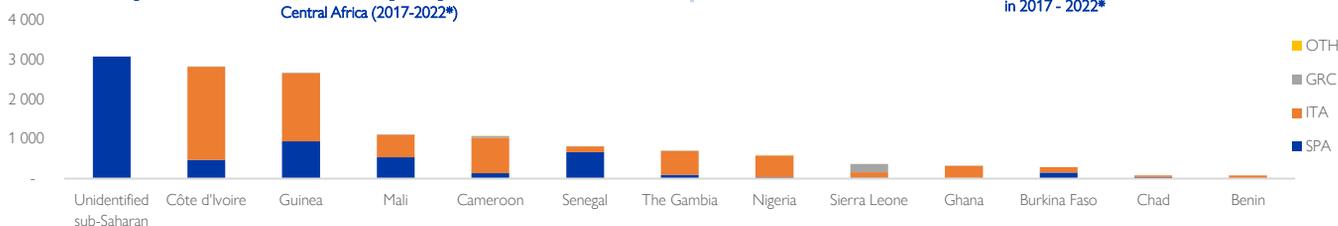

Fig.6- Main destination countries for nationals from West or Central Africa, by nationality (2022*)

SOURCES: National authorities and IOM, Hellenic Coast Guard, Italian Ministry of Interior, Maltese Ministry of Interior - National Security and Law Enforcement, Frontex, Spanish Ministry of Interior (www.migration.iom.int) * Data for 2022 covers the period up to 30 September 2022 (January – September 2022). This data will be regularly updated in future publications. ** Proportion of WCA irregular arrivals to Europe in Fig.3 is computed based on known arrivals (80 per cent of all arrivals in 2017-2022) and as such doesn't provide an exhaustive picture of nationalities of arrivals

Many travel accounts collected from migrants report disappearances or deaths along the migratory routes between West and Central Africa and North Africa or at sea while attempting to cross the Mediterranean, the Sahara or on the route to the Canary Islands. The death or disappearance of men, women and children along these routes is a daily reality.

IOM, through its Missing Migrants Project (MMP), collects and consolidates information on migrants who have died or gone missing during their migratory journeys. The data collected within the framework of this project are used to inform indicator **10.7.3 of the Sustainable Development Goals** ("Number of migrants who died trying to cross borders by sea, air or land") and also contribute to the **Goal 8 of the Global Compact for Safe, Orderly and Regular Migration (GCM)** ("Save lives and establish coordinated international efforts on missing migrants"). This project is essential for a comprehensive response in reducing the risks associated with migratory movements and addressing the needs of families of missing migrants.

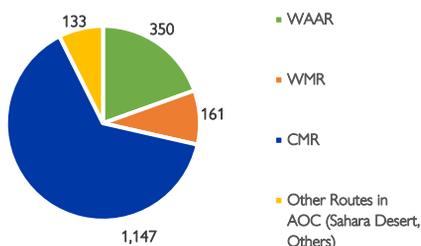

The data available on migrants who have died or are gone missing are incomplete due

to the hazards of irregular journeys, including the remoteness of migratory routes in the WCA region. In addition, a lack of official data on missing migrants means that hard-to-access eyewitnesses are often the only source of information on migrant deaths. The data presented in this report is mostly collected by IOM missions and the authorities following search and rescue activities. Many other cases of deaths or disappearances on the migratory routes likely go unreported. The data presented in this report are therefore not entirely exhaustive and probably underestimate the reality of these deaths and disappearances along the migration routes from West and Central Africa toward North Africa and Europe.

* Data for 2022 covers the period up to September 30, 2022 (January – September 2022). These data will be regularly updated in future publications. And is available on www.missingmigrants.iom.int. Some data on nationalities are only partially available.

CMR: Central Mediterranean Route
WMR: Western Mediterranean Route
WAAR: West African Atlantic Route
Other Routes: Other Routes in West and Central Africa (Sahara Desert, Other).

Migratory route along which migrant deaths and disappearances were recorded in 2022*

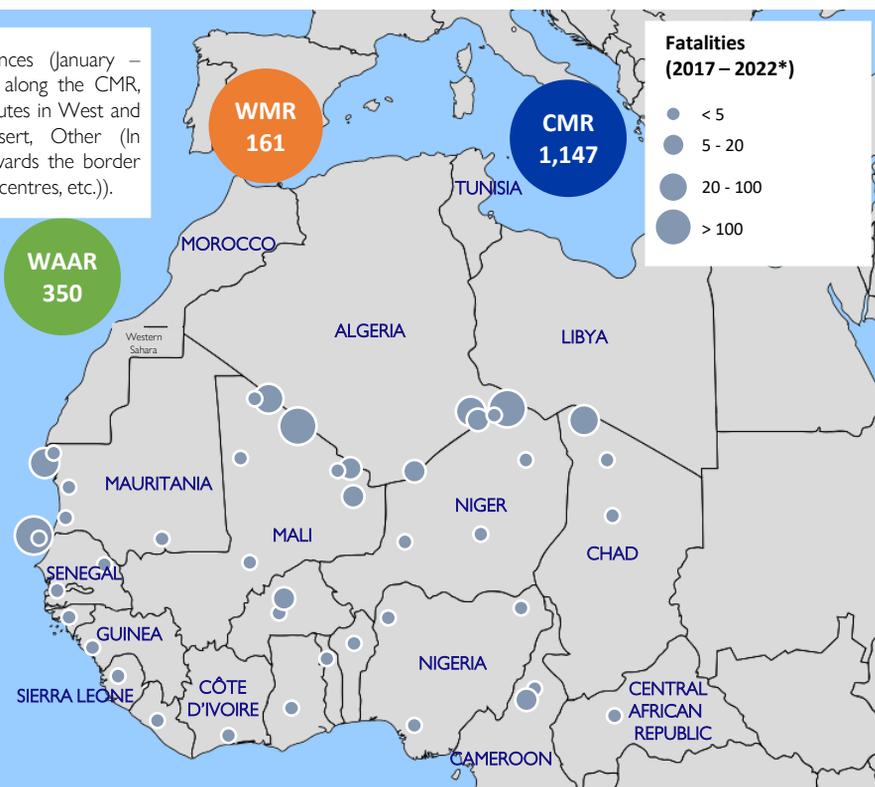

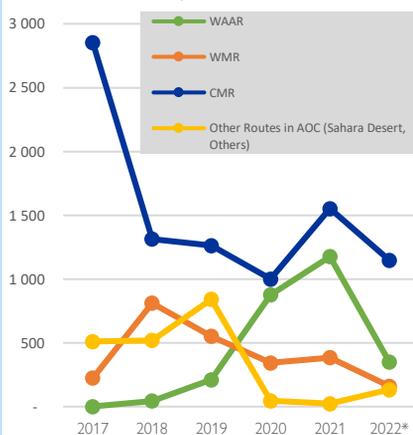

In total, **1,791** people disappeared while trying to cross the Mediterranean and the Atlantic between January and September 2022*. Disappearances are mainly linked to suspicions of drowning, dehydration or hypothermia. In most cases of death or disappearance, the nationality of individuals is unknown.

	DROWNING (Presumed)	VEHICLE ACCIDENT	SICKNESS	LACK OF FOOD, WATER, SHELTER	ACCIDENTAL DEATH	UNKNOWN
CMR	1,066	18	2	19		42
WAAR	282	2	1	43		22
WMR	130	1		4		26
Other Route		23	20	70	9	11

1,791

Total deaths or disappearances (January – September 2022*) recorded along the CMR, WAAR, WMR and Other Routes in West and Central Africa (Sahara Desert, Other (In northern Mali and Niger, towards the border with Algeria, in other regional centres, etc.)).

Number of migrant deaths and disappearances by migratory route leading from West and Central Africa to Europe, 2017 - 2022*

NOTE ON SOURCES AND METHODOLOGIES:

The existing data on deaths and disappearances of migrants in West and Central Africa have certain limitations. Information on incidents involving the death or disappearance of migrants is scarce. There is little disaggregated information available or the **precise location of their death or disappearance**. IOM's [Missing Migrants Project](#) is the only public and freely accessible database on the deaths or disappearances of migrants. In Africa, MMP data comes from different sources, including **IOM data, government data, as well as information provided by NGOs and the media**. Until 2020, interviews with migrants conducted as part of the **Mixed Migration Center's 4Mi** initiative were a key source of data. However, 4Mi stopped collecting data on dead and missing migrants along migratory routes in 2020. This explains the decrease in reported deaths and disappearances from 2020 onward.
