

73 IDP HHs

33% decrease in displacement from the previous week (109 HHs)

5 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 18 and 24 December 2022, IOM Yemen DTM tracked 73 households (438 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 64 per cent (47 HHs) of the total and followed by economic reasons related to conflict, accounting for 36 per cent (26 HHs).

From 1 January to 24 December 2022, IOM Yemen DTM tracked 10,090 households (HH)³ (60,540 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern mainly from mid-August 2022.

IOM DTM also recorded five returnee households in the governorates of Ma'rib (4 HHs) and Al Bayda (1 HHs) returning to their locations of origin during the reporting period due to an improved security situation.

1. Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.

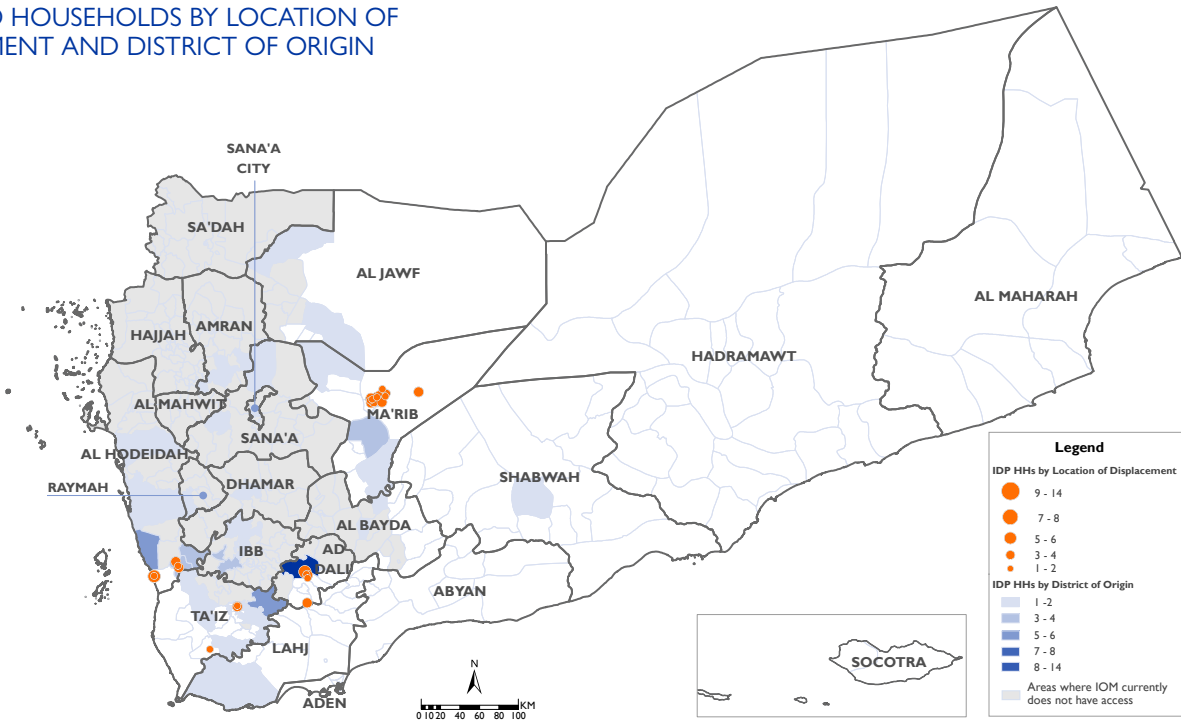

2. IOM DTM estimates that one household represents six individuals.

3. Please note that further additions to previous reporting periods can be reflected in cumulative totals without being individually addressed in narrative reports.
