52% decrease in displacement from the previous week (73 HHs)

0 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 25 and 31 December 2022, IOM Yemen DTM tracked 35 households (210 individuals)<sup>2</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 60 per cent (21 HHs) of the total and followed by economic reasons related to conflict, accounting for 40 per cent (14 HHs).

From 1 January to 31 December 2022, IOM Yemen DTM tracked 10,135 households (HH)<sup>3</sup> (60,810 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern mainly from mid-August 2022.
