

39,623 internally displaced households (**155,166** individuals, 77% more compared to August 2022) were identified in 246 host communities and 50 sites

97% were displaced by urban violence, 2 % by disasters and 1 % by other causes

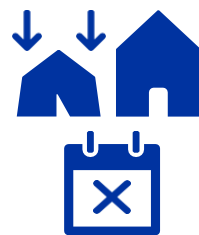

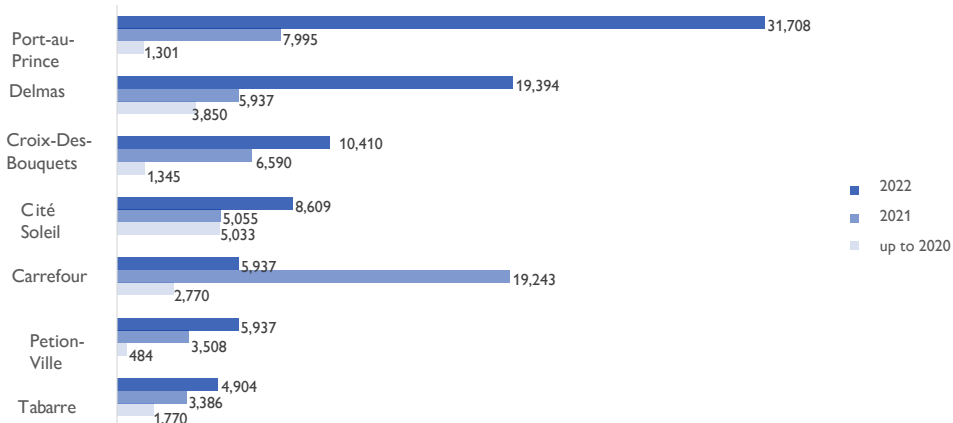

CONTEXT

Since June 2021, an upsurge in armed attacks has caused widespread insecurity in several communes of the Port-au-Prince Metropolitan Area (Zone Métropolitaine de Port-au-Prince – ZMPP in French) and displaced tens of thousands of people. Insecurity in the capital, which has accelerated since the assassination of President Jovenel Moïse in July 2021, has exacerbated the already difficult economic and political conditions facing Haiti.

To provide a holistic view of the displacement situation in the ZMPP, the Haitian Directorate General of Civil Protection (DGPC) and IOM's Displacement Tracking Matrix (DTM), launched regular site and neighbourhood assessment activities in August 2022. A first exercise (round 1) was conducted, after which a first report was published.

This dashboard is the result of the second exercise (round 2) of site and neighbourhood assessments conducted in the ZMPP from October 25 to November 23, 2022. Data was collected by telephone from key informants. The results indicate that 155,166 people (39,623 households) were displaced in the ZMPP as of November 23, 2022, representing a 77 percent increase from Round 1. This is primarily due to the worsening security situation in the ZMPP observed during September 2022.

YEAR OF ARRIVAL OF IDPs, BY COMMUNE

75% of IDPs live in host communities and 25% in sites

86,899 individuals were displaced in 2022, **51,714** in 2021 and **16,553** in 2020

DISPLACED POPULATIONS IN HOST COMMUNITIES (HC) AND SITES, BY COMMUNE

Commune	# IDPs in Host Communities	# IDPs in Sites	% IDPs in HC	% IDPs in Sites	# Sites	# HCs
