

EMERGENCY EVENT TRACKING

Data collection: 8 January 2023

Conflict

As a subcomponent of the Mobility Tracking methodology ([Round Five](#)), the Emergency Event Tracking (EET) tool is deployed to track sudden displacement, provide more frequent updates on the scale of displacement, and quantify the affected population when needed.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal violence in Kereneik locality, West Darfur. Clashes erupted on 4 December over a property dispute at a local market involving Arab nomads and Masalit tribe. On 22 April 2022, inter-communal clashes resumed between Arab Nomads and the Masalit tribe following the discovery of two deceased nomads on 21 April 2022 near Hashaba village - approximately 1km West of Kereneik Town in Kereneik locality, West Darfur. For more information, please see [EET Kereneik \(Kereneik town\), West Darfur \(Update 010\)](#).

The eleventh EET update estimates a total number of 26,066 individuals (5,040 households) currently seeking shelter in Kereneik Town (65%), Um Tajok (24%), Morayat (3%), in Kereneik locality, and Ag Geneina Town (8%) in Ag Geneina locality, West Darfur. Field teams report that, following an improvement of the security situation in and around Kereneik Town, the reduction in the IDP caseload since the previous update can be largely explained by a portion of the caseload returning to their locations of origin. The IDP caseload was originally displaced from Abuja IDP camp (59%), Um Dowain (6%), Hameeda (5%), Shootak (4%), Kamkama (4%), Zawya (3%), Garaa (3%), Kabara (2%), Um Dukhun Al Sad (2%), Temaid (2%), Azerni (2%), Tangaki (1%), Haraza Teman (1%), Hehmiad (1%), Hashaba Andro (1%), among other locations (4%) in Kereneik locality, West Darfur.

Data on losses and casualties can be found across the previous updates. All displaced individuals are Sudanese nationals. At least 3,540 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 3,910 persons with disabilities among the IDP caseload.* Based on a ranking scale, the three priority needs across the caseload are Water, Sanitation and Hygiene (WASH), Food, and Non-Food Items.

Return Intention

Data collected through the return intention indicator estimates that 23,256 IDPs (89%) intend to return to their locations of origin upon improvement of the security situation. The remaining 2,810 IDPs (11%) intend to remain in their current locations.

IOM DISCLAIMER
The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.
IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

* DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).
