IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 22 and 28 January 2023, IOM Yemen DTM tracked 160 households (960 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 87 per cent (140 HHs) of the total followed by economic reasons related to conflict, accounting for 13 per cent (20 HHs).

From 1 to 28 January 2023, IOM Yemen DTM tracked 898 households (HH)³ (5,388 Individuals) who experienced displacement at least once.

IOM DTM also recorded three returnee households in the governorate of Ma'rib returning to their locations of origin during the reporting period.
