

MOVEMENT SUMMARY - AFGHANISTAN TO AND FROM NEIGHBORING COUNTRIES

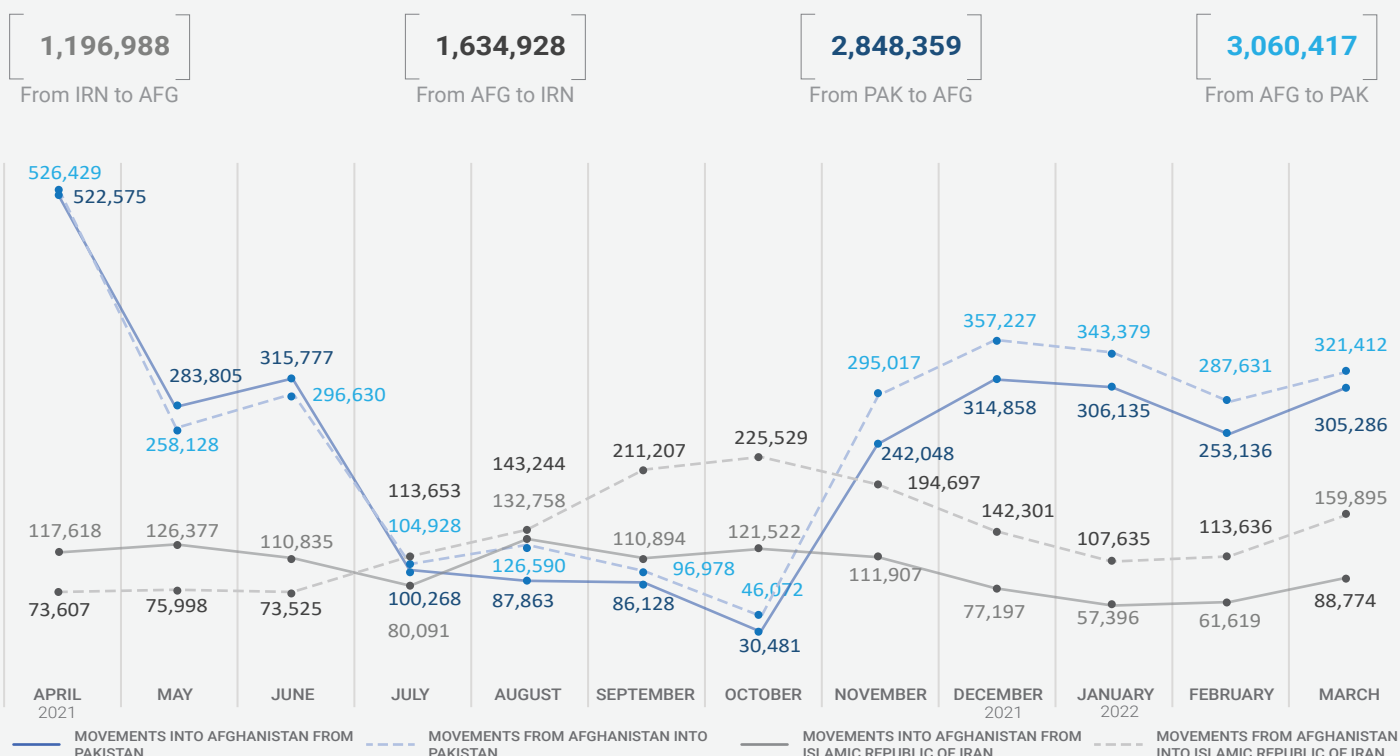

Acknowledging the deep rooted generosity of the people and the governments of Islamic Republic of Iran and Pakistan for hosting millions of Afghan migrants and refugees for over 4 decades, this document captures present mobility and displacement trends between Afghanistan, the Islamic Republic of Iran and Pakistan.

THIS WEEK'S HIGHLIGHTS

- The reporting week witnessed considerably reduced outflow movement between Afghanistan and the Islamic Republic of Iran, with only 4,141 individuals leaving Afghanistan compared to 36,948 last week. The inflows remained similar from 23,256 last week to 23,583 during this reporting period.
- Crossings between Afghanistan and Pakistan saw similar decrease in both outflows and inflows, with an average of 8,655 outflows per day compared to 10,614 in the previous week and an average of 8,238 inflows per day compared to 10,095 in the previous week.

TRENDS OF MOVEMENT IN AND OUT OF AFGHANISTAN IN THE LAST 1 YEAR (APR 2021 - MAR 2022)

FROM ISLAMIC REPUBLIC OF IRAN

The weekly movements from the Islamic Republic of Iran into Afghanistan remained similar, 23,256 in the previous week to **22,583** in the reporting period. IOM assisted 5,078 returnees, of which **3,940 (78%) were male and 1,138 (22%) were female**. During this reporting period, more than 73% (16,693) of all crossings of Afghan nationals from the Islamic Republic of Iran to Afghanistan were deportations. The remains of 29 Afghan nationals, who reportedly died due to accidents and natural causes, were repatriated in the week of 2 April to 8 April.

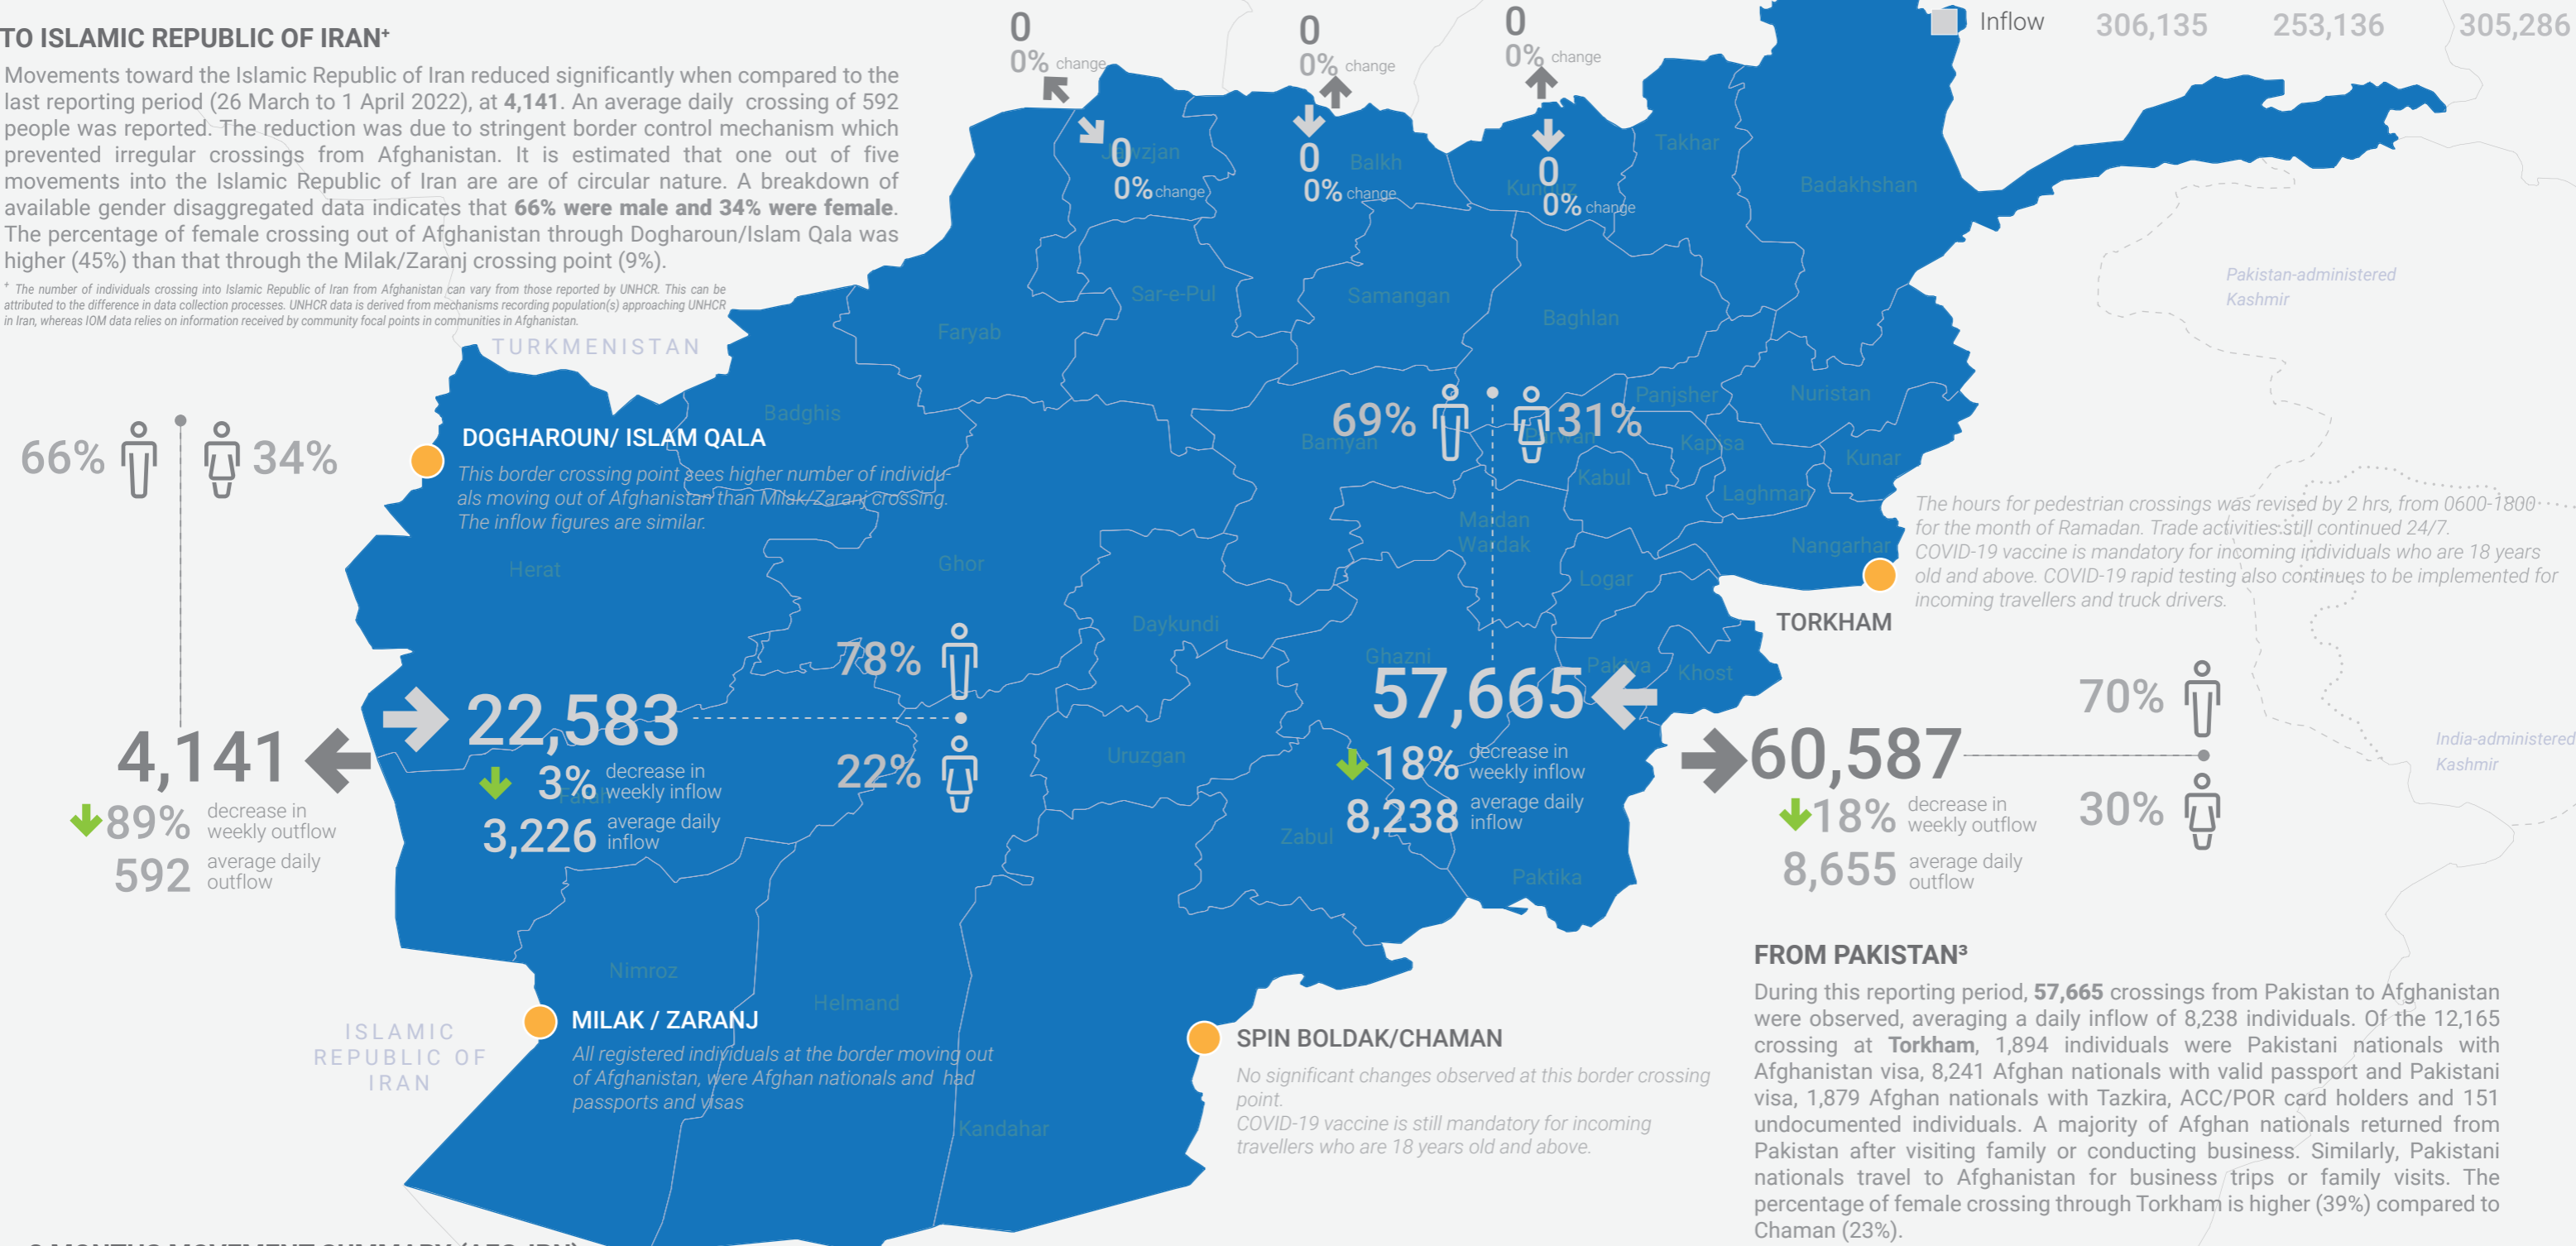

TO ISLAMIC REPUBLIC OF IRAN*

Movements toward the Islamic Republic of Iran reduced significantly when compared to the last reporting period (26 March to 1 April 2022), at **4,141**. An average daily crossing of 592 people was reported. The reduction was due to stringent border control mechanism which prevented irregular crossings from Afghanistan. It is estimated that one out of five movements into the Islamic Republic of Iran are of circular nature. A breakdown of available gender disaggregated data indicates that **66% were male and 34% were female**. The percentage of female crossing out of Afghanistan through Dogharoun/Islam Qala was higher (45%) than that through the Milak/Zaranj crossing point (9%).

* The number of individuals crossing into Islamic Republic of Iran from Afghanistan can vary from those reported by UNHCR. This can be attributed to the difference in data collection processes. UNHCR data is derived from mechanisms recording population(s) approaching UNHCR in Iran, whereas IOM data relies on information received by community focal points in communities in Afghanistan.

3 MONTHS MOVEMENT SUMMARY (AFG-PAK)

Inflow	57,396	61,619	88,774

TO PAKISTAN³

Movements from Afghanistan into Pakistan decreased when compared to last week and the reporting period saw a total of **60,587 crossings**. Among the 9,787 individuals who crossed from Torkham, 1,374 were Pakistani nationals, 7,490 Afghan nationals with valid visas, three individuals with third country passports, 503 Afghan patients that required medical treatment in Pakistan, along with 417 were attendants (person who accompanies a sick person/patient). Out of the total individuals, **62% were male and 38% female**. Similarly to the inflow gender ratio, the percentage of female crossing through Torkham is higher (38%) compared to Chaman (23%).

¹Undocumented individual: An individual of Afghan origin in Pakistan or Islamic Republic of Iran who does not have valid documents. Valid documentation includes: a valid Proof of Registration (PoR) card issued by the Government of Pakistan, an Afghan Citizen Card (ACC), and either a valid Pakistan visa, an Amayesh card, or a valid Iranian visa to remain/stay in Pakistan or the Islamic Republic of Iran.

²Spontaneous returns: Individuals crossing the border to Afghanistan willingly and without being forced or coerced. These individuals can be documented or undocumented.

³The number of individuals crossing into and from Pakistan are based on the compilation of numbers coordinated between IOM Afghanistan and IOM Pakistan. The numbers do not reflect nationalities and may include Afghans, Pakistanis and third country nationals.

BASELINE MOBILITY ASSESSMENT (BMA) AND COMMUNITY-BASED NEEDS ASSESSMENT (CBNA)

The BMA assessment tracks mobility, provides information on population estimates, locations and geographic distribution of displaced, return and migrant populations, reasons for displacement, places of origin and periods of displacement. The CBNA documents vulnerabilities and multisectoral needs. Data is collected at the settlement level, through focus group discussions with community focal points and direct observations. Round 14⁴ of the BMA and CBNA were conducted in November and December 2021.
