IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 29 January and 4 February 2023, IOM Yemen DTM tracked 66 households (396 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 65 per cent (43 HHs) of the total followed by economic reasons related to conflict, accounting for 35 per cent (23 HHs).

From 1 January to 4 February 2023, IOM Yemen DTM tracked 1,068 households (HH)³ (6,408 Individuals) who experienced displacement at least once.

IOM DTM also recorded five returnee households in the governorate of Ma'rib returning to their locations of origin during the reporting period.
