

The purpose of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. The information is collected through interviews with key informants or direct observation. This dashboard presents information on the movements that took place early December 2022 in the 16 villages of the sub-prefecture of Karal, located in the Hadjer-Lamis region of Chad.

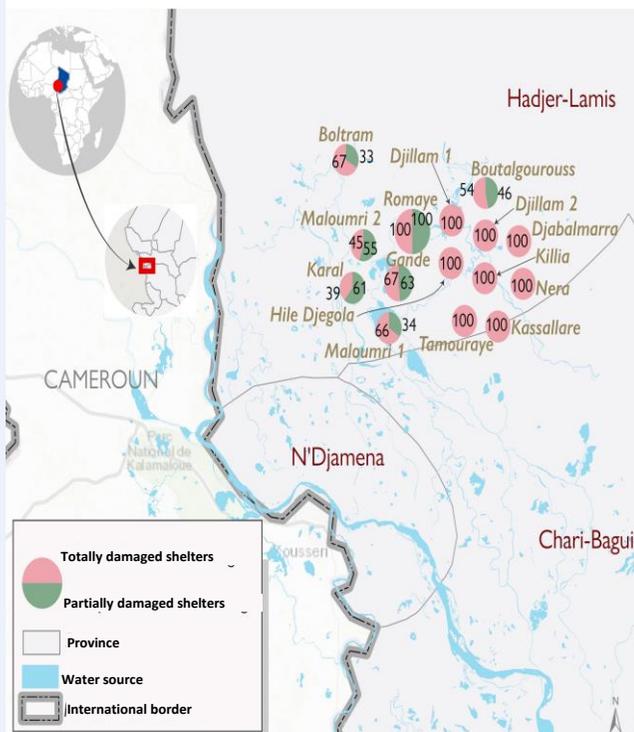

From 22 to 25 November, some of the villages mentioned in the evaluation sheets of the sub-prefecture of Karal in the department of Dagana and the province of Hadjer-Lamis were flooded by the rising waters of Lake Chad, according to the rapid evaluation made on 3 December 2022. According to this evaluation, these villages have registered several displaced people; children, women and elderly people have left their places of residence to take refuge in the surrounding villages, notably Karal, Mouloumirie, Baltrame, Karga etc. These households have indicated that their shelters are not safe.

These households have indicated that their shelters have been partially or totally destroyed, creating priority needs for food, health services, education, blankets and tents/covers.

 16
 Locations evaluated

 2 736 Affected households
 16 257 Affected individuals

 2 414 Displaced households
 16 256 Displaced individuals

 Evaluation conducted
 in the field
