

Population overview (October 2022): 57,459 individuals

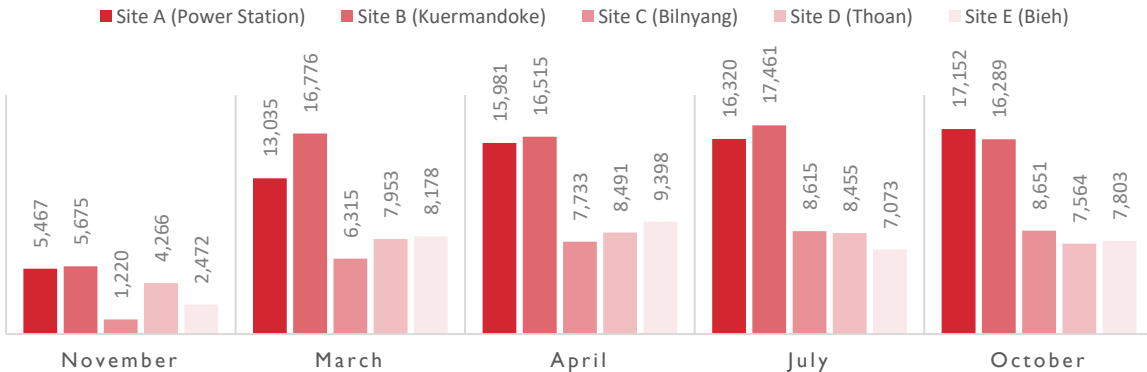

Unity State has been experiencing flooding since 2019 in the counties of Mayendit, Leer, Panyijiar, and Koch. As a result of the flooding in Guit and Rubkona in 2021, Bentiu Town Sites (A, B, C, D, and E) were formed in August 2021. In order to provide accurate information on the Internally Displaced Persons (IDPs), the International Organization for Migration’s Displacement Tracking Matrix (IOM DTM) began conducting monthly population counts in November 2021, including questions on areas of habitual residence, areas of displacement, intentions to return or relocate and demographic information to inform partners.

As per October 2022 population count findings, the Bentiu Town Sites (A, B, C, D, and E) population stands at 57,459 individuals / 8,852 households (on average 6 individuals per households). This represents a one per cent decrease (465 individuals/152 households) compared to July 2022.

Between 1 August - 31 October 2022, Rapid Flow Monitoring (RFM) at points of entry in Bentiu Town Sites (A, B, C, D, and E) indicates an increase in new arrivals (55%). Forty-five per cent are found leaving the sites. Most of the increased new arrivals during this period were recorded in Site C (28%), Site D (16%) and Site B (4%), most of whom came from locations within Unity State (99%), with Rubkona County (64%), Guit (34. IDPs arriving at the sites travelled using boats (82%) or came by foot (13%), and other means (5%).

Monthly population trend at Bentiu Town Sites, November 2021 - October 2022*

*In December 2021, January, February, March, August, and September (2022), IOM was unable to conduct population counts.

Collective Centres recorded in July – October 2022**

Site Name	No. HH	No. Inds
1 Makazin Site	220	1,433
2 kalibalek (Bentiu)	146	1,076
3 Dar El-Saalam (Bentiu)	98	580
4 Former Military Barack (Bentiu)	94	627
5 Suk-Shaabi Site (Bentiu)	48	355
6 Suk-Sita Site (Rubkona)	48	433
7 Nine Counties Site	44	313
8 Suk-Saba Site (Bentiu)	19	121

** Numbers not included in the overall population count.

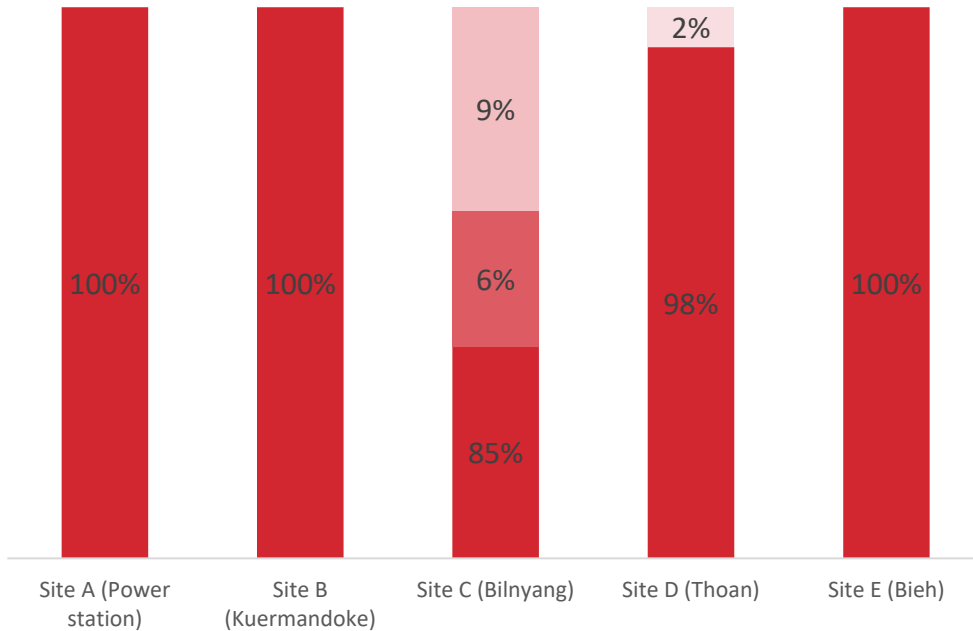

The population count findings for all sites indicate that 95 per cent of the IDPs are arriving from their place of habitual residence. Of these individuals, five per cent (3,008 ind.) intend to leave the sites (63% of those to the same place of origin). Of the IDPs arriving from a different location to their habitual residence (1,708 ind.), 37 per cent intended to leave the site.

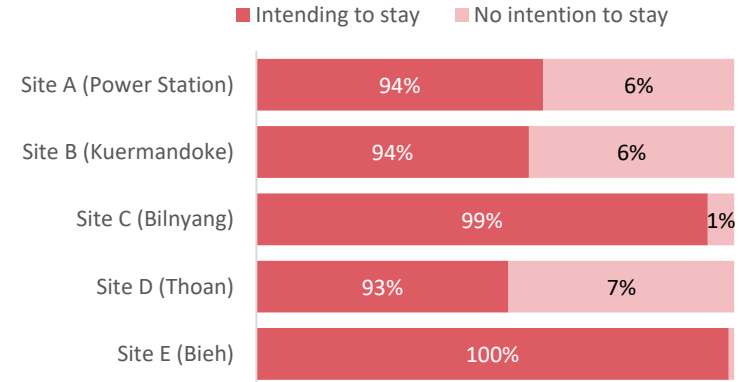

Respondents report the high likelihood of sites getting flooded (2,666 ind.) and a lack of service provision (19 ind.), among others (10 ind.), are the main reasons for IDPs intending to leave.

Main reasons for IDPs intending to leave the sites

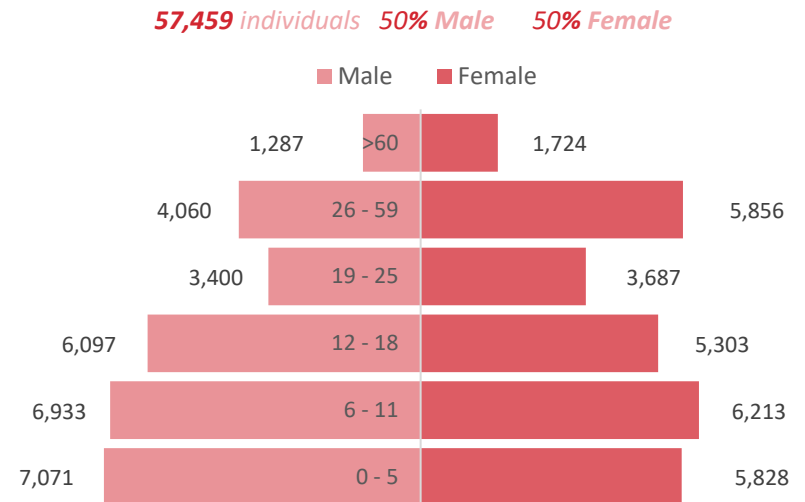

- The area is flooded/likely to get flooded
- Family reunification
- Lack of service provision
- other

IDPs by their intention to stay at the sites (A, B, C, D and E)

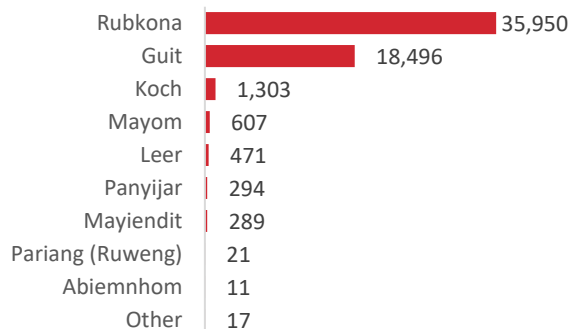

Bentiu Town Sites population by age and sex (October 2022)

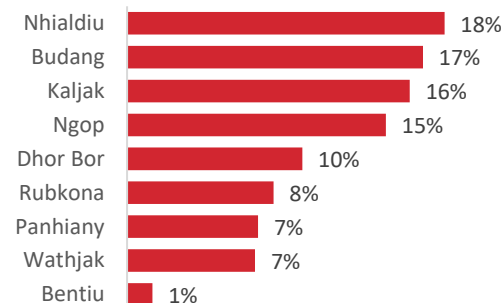

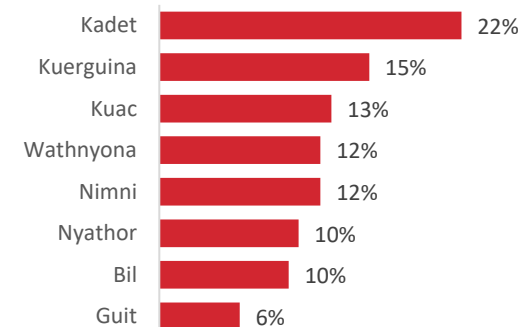

Population by county of displacement

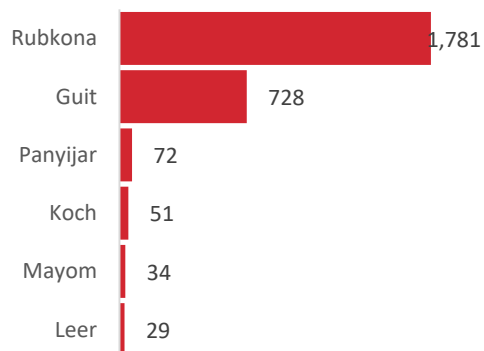

Population displaced from their Payam of origin from within Rubkona County

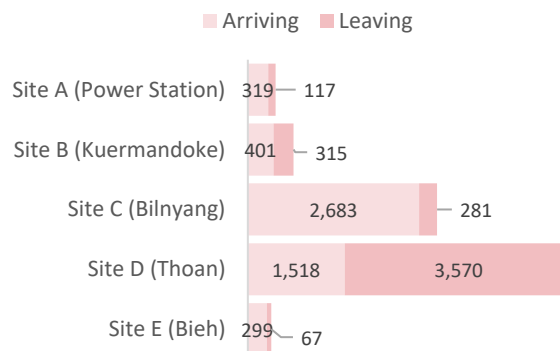

Population displaced from their Payam of origin in Guit County

County of destination for IDPs intending to leave the sites

Individuals interviewed through Rapid Flow Monitoring (RFM) entering and leaving the sites 1 August - 31 October 2022 [n = 9,570]

Means of transportation for ind. interviewed through Rapid Flow Monitoring (RFM) entering and leaving the sites 1 August - 31 October 2022 [n = 9,570]
