

METHODOLOGY

	Assessment conducted in affected areas	
	Assessment conducted through phone interviews with key informants	

SUMMARY OF THE EVENT

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements as well as security and climactic emergencies. Information is collected through phone interviews with key informants and direct observation.

A fire, of unknown origin, occurred on 8 February 2023 in the Site of Saint Monfort, the site hosting the most displaced people in the Metropolitan Area of Port-au-Prince (2,000 households of 7,500 IDPs according to [latest DTM assessments in November 2022](#)). As a result of this fire, 43 households made up of 176 individuals lost their shelters. These households took refuge with other households residing on the site.
