

In response to the needs of people affected by the recent floods and after the request of the A/HCT and HAC in South Darfur State, the DTM team conducted registration and verification exercises in three sectors (**sectors 1, 7 & 8**) in Kalma IDP camp, South Darfur to register and identify the flood affected population.

Out of **1,780** households reported to be affected by the flood, the IOM DTM team registered and identified **1,427** households in the three targeted sectors in Kalma IDP camp.

Jointly with HAC as well as the community leaders, IOM-DTM team conducted a door-to-door assessment to register and identify the affected population. 65% of the registered households were identified as fully affected while **35%** identified as partially affected. Most of the flood affected households reported to be in **sector 1**.

Services

Health: There is a need to increase hygiene promotion awareness in the camp to respond to the suspected cases of Acute Watery Diarrhea (AWD). The American Refugee Committee (ARC) has quarantined space to provide medical care to the affected IDPs in center eight.

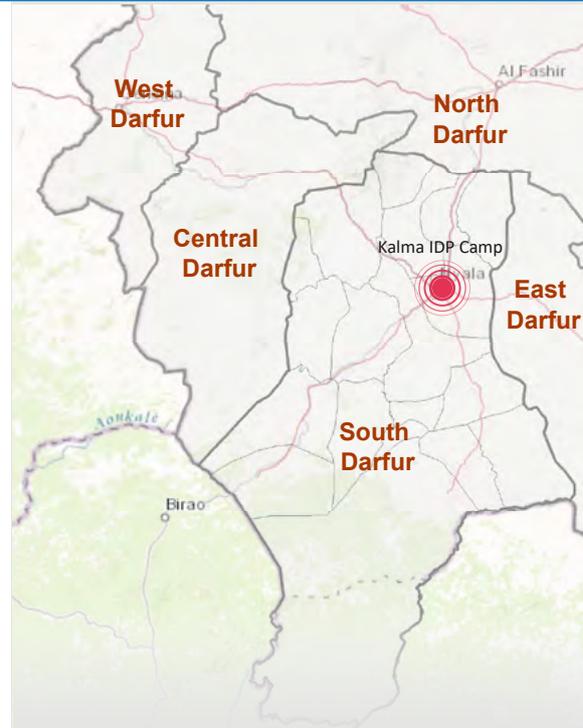

Water, Sanitation and Hygiene (WASH): The flood did not affect the available water sources while most of the latrines are completely damaged resulting in open defecation.

Emergency Shelter/Non-Food Items (ES/NFI): The urgent needs of the affected households identified to be shelter / NFI kits (the most needed items are jerry cans, plastic sheets, kitchen sets and blankets) especially for the elderly and children.

Food Security and Livelihood: During the exercise, the affected households reported that most of their personal belongings, including food and seeds, were swept away by the flood.

Vulnerability

More than 65% of the affected households reported to be females.

Note:

Detailed information related to the demographic data, place of origin, vulnerability, etc. will be shared after processing the data into the IDP's database.

Recommendations:

- ✓ Distribute shelter / NFI kits for the most affected population ASAP.
- ✓ Food assistance for the affected population, especially in center one.
- ✓ Increase hygiene promotion awareness in the camp.
- ✓ Rehabilitate / construct latrines.

Mission Duration:

2-5th July 2017
The Mission was jointly conducted with HAC (State Level)

Funded By European Union Humanitarian Aid
