

### METHODOLOGY

	Assessment conducted in affected areas	
	Assessment conducted through phone interviews with key informants	

### SUMMARY OF THE EVENT

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements as well as security and climactic emergencies. Information is collected through phone interviews with key informants and direct observation.

**A fire caused by a random bullet striking an electric transformer, occurred on 1<sup>st</sup> March 2023 in the site of Camp Zamor, one of the site hosting the most displaced people in the Metropolitan Area of Port-au-Prince (2,047 households of 6,528 IDPs according to [latest DTM assessments in November 2022](#)). As a result of this fire, approximately 371 households made up of 1,101 individuals lost their shelters. Most households took refuge with other households residing on the site while others have gone to neighboring host communities.**
