The DTM Emergency Tracking Tool (ETT) is deployed to track and to collect information on large and sudden population movements, provide frequent updates on the scale of displacement and quantify the affected population when needed. As a sub-component of the Mobility Tracking methodology in Nigeria, ETT utilises direct observations and a broad network of key informants to capture the best estimates of the affected population per location, enabling targeted humanitarian response planning.
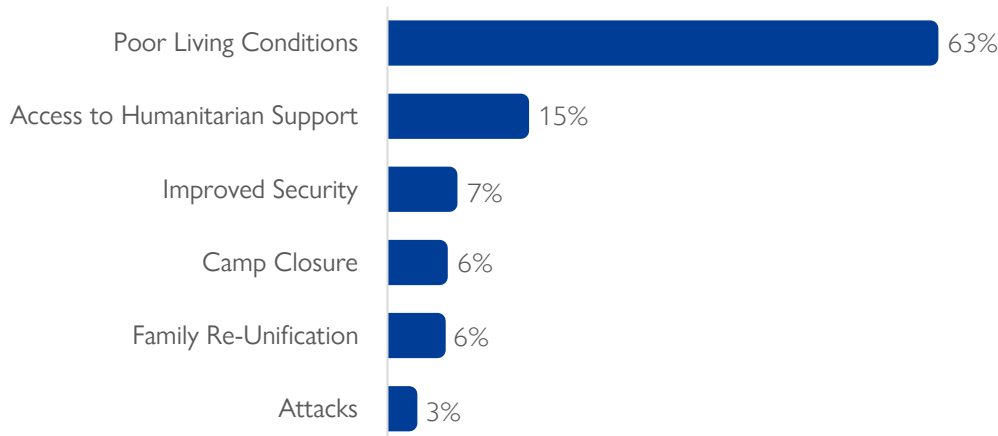

Between 27 February and 05 March 2023, a total of 1,338 new arrivals were recorded in locations in Adamawa and Borno states. The new arrivals were recorded at locations in Askira/Uba, Bama, Dikwa, Gwoza, Gubio, Monguno and Kala Balge* Local Government Areas (LGAs) of the most conflict-affected state of Borno and in Gombi, Hong, Song, Yola South and Yola North LGAs of Adamawa state.

ETT assessments identified the following movement triggers: poor living conditions (842 individuals or 63%), access to humanitarian support (207 individuals or 15%), improved security (96 individuals or 7%), camp closure (81 individuals or 6%), family re-unification (78 individuals or 6%) and attacks (34 individuals or 3%).
