SOMALI REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

806,913 displaced individuals comprising 118,719 households in 331 displacement sites were identified in Somali region*. These figures represent an increase of 123,692 in the total individuals (18%), households (11%) and sites (4%) since round 7 (August/September 2017). 68% sites opened in 2017. Conflict was the primary cause of displacement for an estimated 57% of the displaced population.

DEMOGRAPHICS: 52% of displaced individuals were female and 48% were male. 58% were younger than 18 years old. 9% were over 60 years old.

SHELTER: 134 (40%) sites reported that over 50% of households were living in shelters that were below standard.

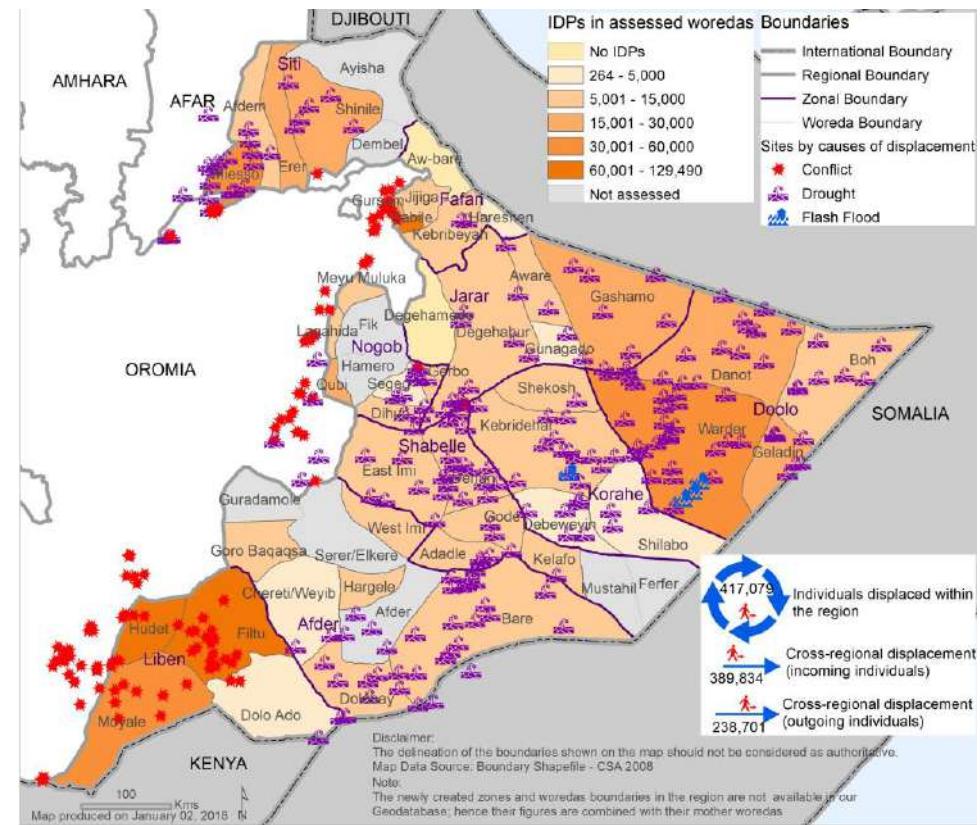

WASH: Only 18 sites meet SPHERE standards of access to over 15 liters of water per person per day. 276 (83%) displacement sites reported having no toilets.

FOOD, NUTRITION AND LIVELIHOODS: 29 (9%) sites, representing 117,047 individuals, reported no access to food. 88% of sites reported that IDPs did not have access to income generating activities

HEALTH: Malaria was the primary health concern in this round of data collection with 148 sites reporting this.

EDUCATION: In 42% of sites (139) less than 50% of children are attending school. Formal primary school education is available at 65% (216) of sites. Alternative basic education (ABE) is available at 39% (128) sites.

* 15 sites were inaccessible during round 8 data collection. Data from earlier assessments has been combined with round 8 data to provide the last known status of these inaccessible sites.

PROTECTION: Harmful traditional practices were reported across many sites. These practices included: female genital mutilation and child marriage.

COMMUNICATION: 42% of sites reported that the site managers were IDPs primary source of information followed by local leaders (27%) and Authorities (20%).

LOCATION, ORIGIN AND CAUSE OF DISPLACEMENT

- Of the total IDP population identified in Somali region (806,913 individuals) 51% (408,933) IDPs were displaced in 2017. The remaining 49% were displaced prior to 2017.
- 68% of all sites identified opened between January and December 2017. 5% opened during 2016 and 27% opened before 2016.
- Figure 1 shows the estimated number of IDPs by assessment round and cause of displacement. Figure 2 shows the number of IDPs displaced by zone and cause of

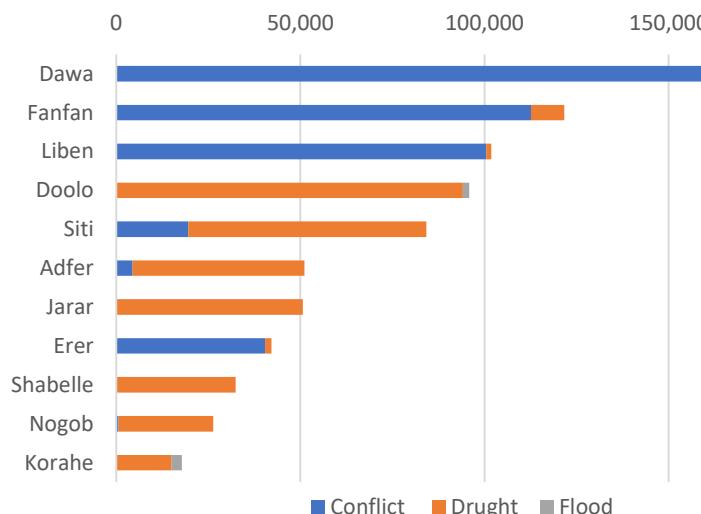

Figure 2: Estimated IDPs displaced by zone and cause of displacement

displacement. Figure 3 shows the drivers of displacement disaggregated by the number of IDPs in sites reporting new arrivals in 2017.

- 51% of IDPs in Somali region are internally displaced within the region, while 47% are displaced from Oromia region and the remaining 2% are displaced from other regions.
- Of the IDPs displaced within Somali region, 86% were displaced within their zone of origin.

- Only 12 sites (4%) reported that IDPs had been previously displaced.

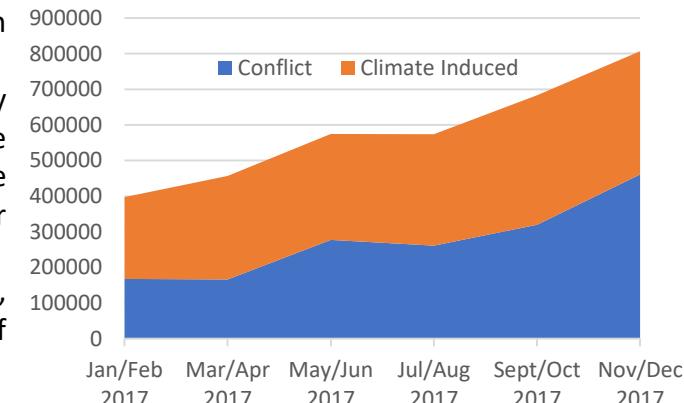

Figure 1: Estimated IDPs in identified sites by assessment round and cause of displacement

Drivers	Total Recorded Population	Percentage of Total Population	Population in Sites Reporting New Arrivals in 2017, Where Sites Opened in 2017.	Percentage of Total Population	Population in Sites Reporting New Arrivals in 2017, Where Sites Opened Before 2017	Percentage of Total Population
Conflict	460,888	57%	136,268	17%	261,003	32%
Drought	341,425	42%	267,792	33%	10,509	1%
Flood	4,600	1%	4,600	0.6%	-	-

Figure 3: Distribution of IDPs by drivers of displacement, total recorded population and population in sites reporting new arrivals in 2017

- IDPs from 20 (6%) sites were leaving the site. Of these, IDPs from 18 sites were going to the nearest village. IDPs from 1 sites were going to their place of origin and from 1 site IDPs intended to stay close to the displacement site.
- At 18% of sites IDPs foresaw a resolution to their displacement, while IDPs at 40% of sites did not. At the remaining 42% of sites key informants either did not know, or were not asked the question in a previous round.
- At 99% of sites IDPs prefer reintegration as a durable solution to their displacement. IDPs at two sites respectively prefer relocation and return to their place of origin.
- Figure 3 shows the percentage of sites reporting various obstacles to returns, while figure 4 shows support IDPs need to return or reintegrate.

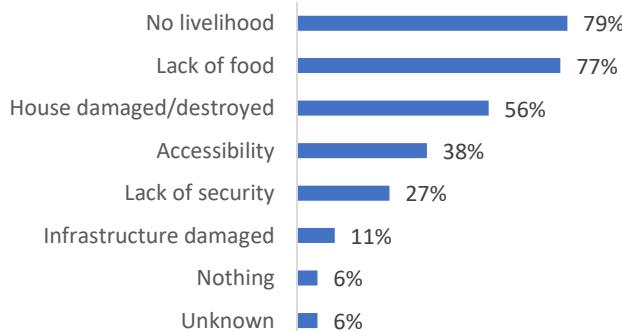

Figure 3: % of sites reporting obstacles to return

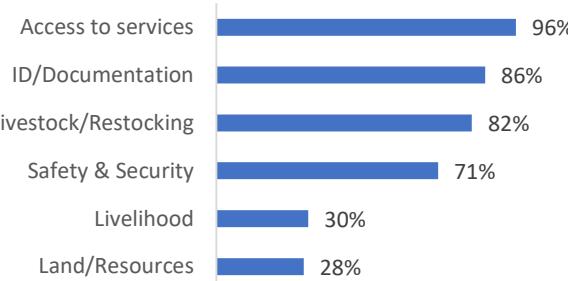

Figure 4: % of sites by support needed for return or reintegration

POPULATION DEMOGRAPHICS

- Of the 806,913 displaced individuals identified in Somali region, 52% were female and 48% were male. 63% were younger than 18 years old. 9% were over 60 years old (figure 5). Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 6.

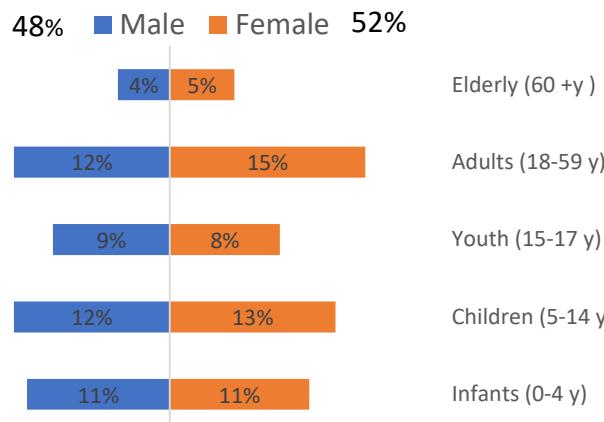

Figure 5: Gender and age distribution

Special vulnerabilities	# Individuals
Pregnant girls under 18	896
Pregnant women over 18	11,027
Breastfeeding mothers	15,954
Persons with disabilities under 18	1,700
Persons with disabilities over 18	1,873
Persons with chronic diseases	1,031
Members of religious minorities	4
Members of ethnic minorities	11
Elderly persons without caregivers	2,723
Unaccompanied children	892
Separated children	1,424
Orphaned children	2,809
Single female headed households	4,843
Single male headed households	2,813
Single child headed households	1,197
Elderly headed households	3,884

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION

ROUND 8: NOVEMBER - DECEMBER 2017

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, eight rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTM implementing partners, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.
