DEFINITION OF TERMINOLOGIES

PEOPLE ON THE MOVE: *Indicative individual movements triggered by conflict/attacks, fear of attacks, search of food/livelihoods, access to humanitarian assistance, natural disaster, intended returns, relocation or family reunification.*
TYPES OF MOVEMENT FLOWS: *To capture the dynamic characteristics of migration, the ETT categorizes 4 types of movement flows: arrivals, departures and transits and returns. Each category is dependent on the recorded triggers of movement, duration of movement as well as movement intentions.*

· **ARRIVALS:** *Individuals arriving at the point of assessment with intentions to stay more than 1 month in current location*
· **TRANSITS:** *Individuals arriving at the point of assessment, with an intention to spend less than one month at current location.*
· **DEPARTURES:** *Individuals leaving the point of assessment to another location.*
· **RETURNS:** *Individuals returning to their locality of origin from previous place of displacement. Please note, the returnee category, for the purpose of DTM data collection, is restricted to individuals who returned to the Location/-Bairro of their habitual residence, or an adjacent area based on a free decision. Mozambique displaced persons having returned to districts of origin without having reached their locality of origin are still displaced and as such not counted in the returnee category.*
