

BI-WEEKLY FLOW MONITORING REPORT: SPONTANEOUS RETURN OF UNDOCUMENTED AFGHANS FROM PAKISTAN (3 DEC. TO 16 DEC. 2022)

OVERVIEW

IOM Pakistan collects data on the outflows of **undocumented Afghan migrants** at the Torkham and Chaman border crossing points in an effort to better understand the migration movements of undocumented Afghan migrants returning to Afghanistan from Pakistan. This exercise is part of the **European Union** funded project “Displacement Tracking Matrix Regional Evidence for Migration Analysis and Policy (DTM REMAP)”.

Between 3 December and 16 December 2022, 2,462 undocumented Afghan nationals spontaneously returned to Afghanistan, including 784 through the Torkham border point and 1,678 through the Chaman border point. Border authorities facilitated the return of 250 individuals due to the lack of legal documentation to remain in Pakistan. Therefore, information about these individuals is not included in the count. Although IOM identified 2,462 undocumented Afghan returnees at two border crossings, this may not reflect the total number of undocumented Afghan returnees. Moreover, for this study, only the head of household or representative of the family were interviewed. This means that the number of interviews conducted by the enumerators is lower than the number of returnees recorded by IOM. Between 3 December and 16 December 2022, IOM interviewed 120 respondents.

HIGHLIGHTS

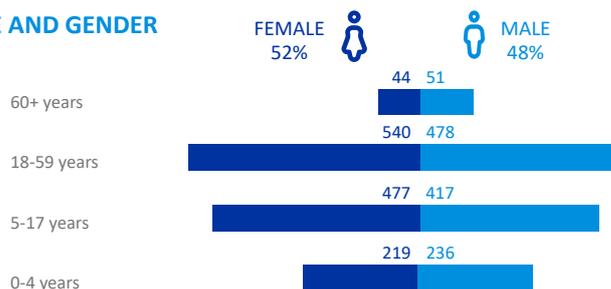

- During the reporting period, 5 per cent of returnees were categorized as vulnerable persons, mainly chronically ill and elderly.
- The primary occupations reported by returnees were: unskilled labor (56%), skilled labor (31%), salaried job (12%) and business (1%).
- All returnees were carrying household items, cash, personal belongings and productive assets when interviewed. They also travelled with additional items, such as productive assets (91%), livestock (2%) and transportation or private vehicles (4%).
- The average cost of travelling from Pakistan to Afghanistan reported was 29,488 PKR per family.
- The top 3 challenges returnees expected to face in Afghanistan were: arranging for livelihoods, finding income opportunities and settling into a new city.
- The modes of transportation used by the returnees from their original location to the border and from the border to their destination, were: pickup (50%), truck (46%) and bus/rented car (4%).
