**DATE OF PUBLICATION: 26 MARCH 2018**

# DISPLACEMENT TRACKING MATRIX (DTM) Tigray REGION ETHIOPIA ROUND 9: JANUARY/FEBRUARY 2018

# DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION ETHIOPIA

## ROUND 9: JANUARY - FEBRUARY 2018

### TIGRAY REGION - KEY FINDINGS

**LOCATION AND CAUSE OF DISPLACEMENT:** 22,488 displaced individuals comprising 7,941 households in 60 displacement sites were identified in Tigray region. These figures represent an increase of 1,736 in the total individuals (+8.37%) an increase of 320 households(+4.20%) and a decrease of 1 site (-1.64%) since round 8 (November/December 2017). 88.35% of sites opened before 2017 and 11.67% opened during 2017. Conflict was the primary cause of displacement for an estimated 95% of the displaced population.

**DEMOGRAPHICS:** 46% of displaced individuals were female and 54% were male. 49% were younger than 18 years old. 5% were over 60 years old.

**SHELTER:** No sites reported that more than 25% of households were living in shelters that were below standard.

**WASH:** Only 3 sites meet SPHERE standards of access to over 15 liters of water per person per day. 9 (15%) displacement sites reported having no toilets.

**FOOD, NUTRITION AND LIVELIHOODS:** 15 (25%) sites, representing 3,599 individuals, reported no access to food. 83% of sites reported that IDPs did not have access to income generating activities

**HEALTH:** Malaria was the primary health concern in this round of data collection with 23 sites reporting this.

**EDUCATION:** In 13% of sites 50% or less of the children on site are attending school. Formal primary school education is available at 60 sites. Alternative basic education (ABE) is not available at any sites.

**COMMUNICATION:** 53% of sites reported that the authorities were IDPs primary source of information followed by local leaders at 42% of sites. Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

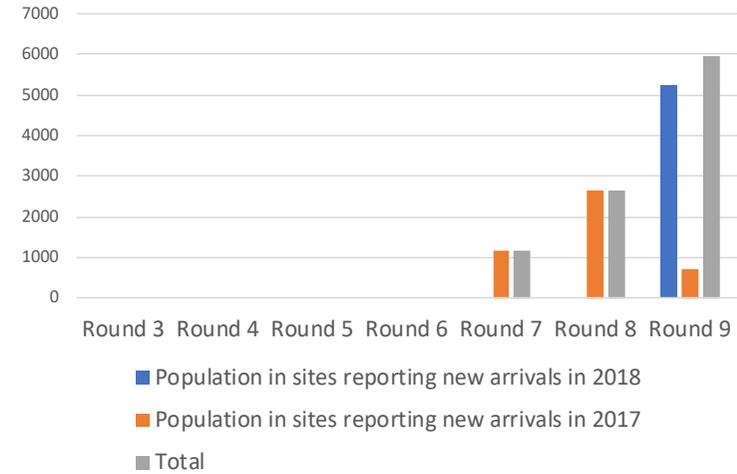

Figure 1: Trends in stock totals of displacement and new displacements from 2017 and 2018

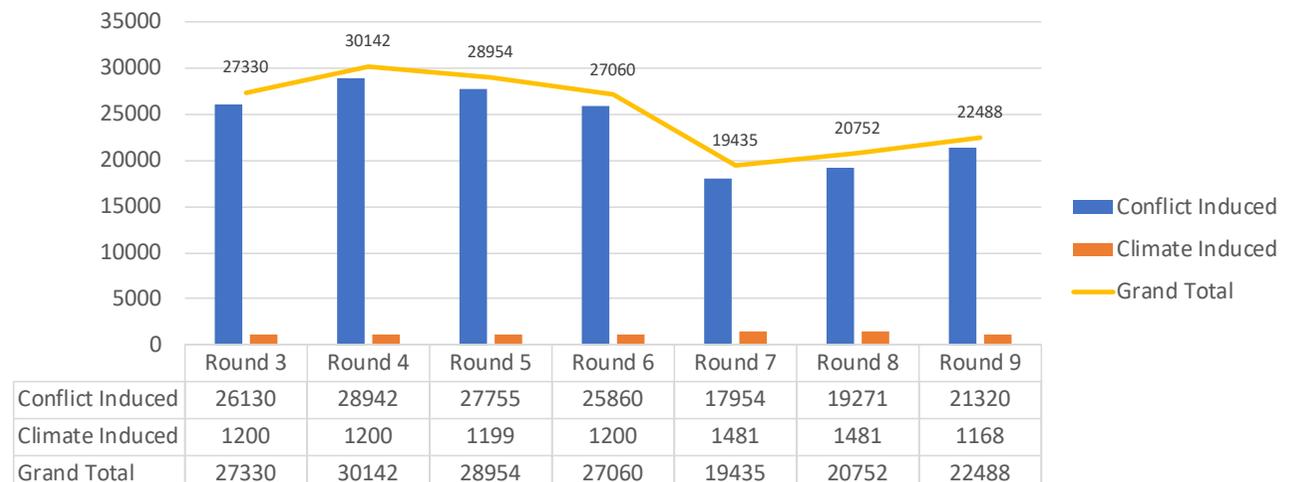

Figure 2: IDPs by cause of displacement by round

## DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION ETHIOPIA ROUND 9: JANUARY - FEBRUARY 2018

### MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

At 13 of the 50 sites new IDP arrivals were recorded in 2018. At 7 sites the last IDP arrivals were recorded in 2017 and at the remaining 20 sites no new IDPs had arrived in 2017.

None of the identified sites opened in 2018 while 11.67% opened between January and December 2017. 88.33% of sites opened before 2017.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

36.26% of IDPs in Tigray region are internally displaced from the region within the region. Of the IDPs displaced within Tigray region, 36.26% were displaced within their zone of origin. 5% (1,168) IDPs had reportedly been previously displaced.

IDPs from 1 (2%) site were leaving the site. IDPs from this site were going to the nearest village.

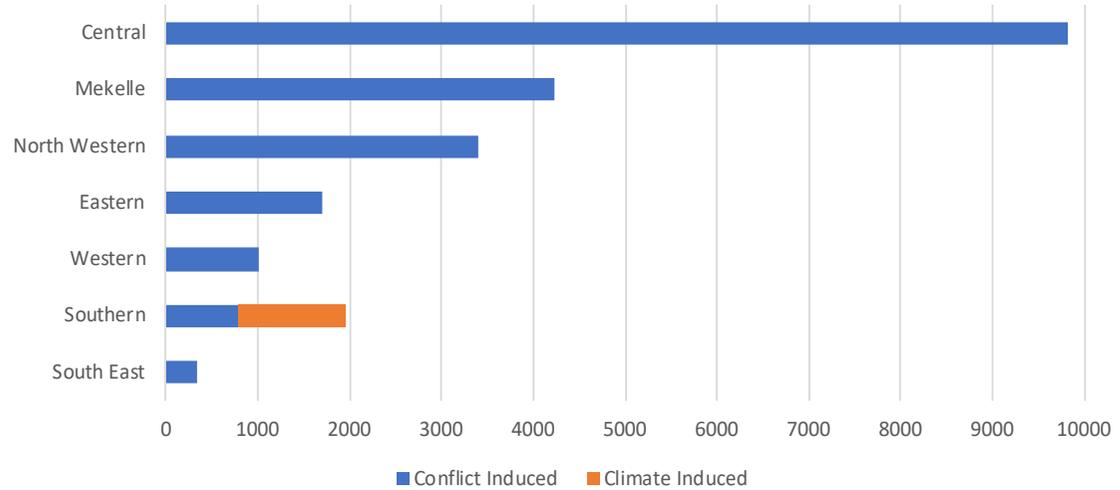

Figure 3: IDPs displaced by zone and cause of displacement

Site start date	Conflict		Climate	
	Total affected population	% total affected population in sites reporting new arrivals 2017-2018	Total affected population	% total affected population in sites reporting new arrivals 2017-2018
Before 2017	21,020	24.80%	723	0%
During 2017	300	100%	445	100%

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

## DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION ETHIOPIA ROUND 9: JANUARY - FEBRUARY 2018

### DURABLE SOLUTIONS, VOULNERABILITIES AND DEMOGRAPHICS

At 91.67% of sites IDPs foresaw a resolution to their displacement, while IDPs at 8.33% of sites did not.

At 81.67% of sites IDPs prefer reintegration as a durable solution to their displacement while 18.33% prefer relocation.

Figure 5 shows the percentage of sites reporting various obstacles to returns, while figure 6 shows support IDPs need to return or reintegrate.

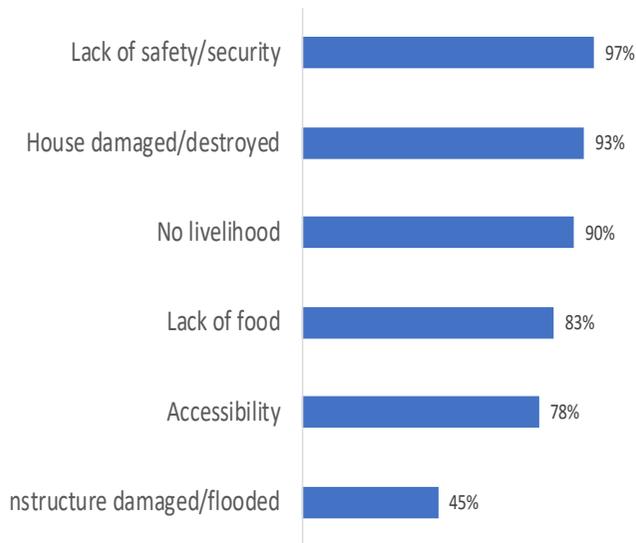

Figure 5: % Sites reporting obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

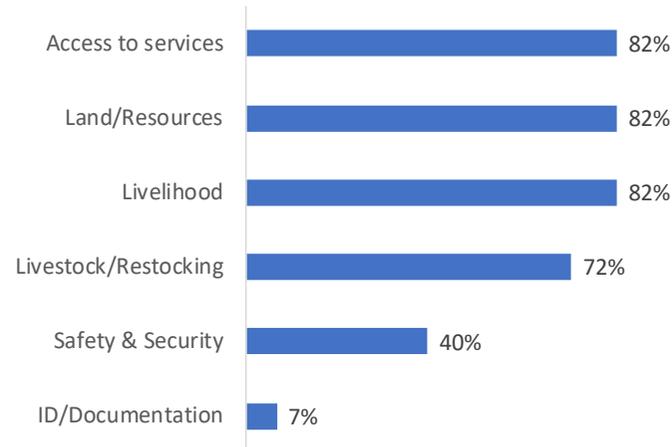

Figure 6: % Sites by support needed to return or reintegrate

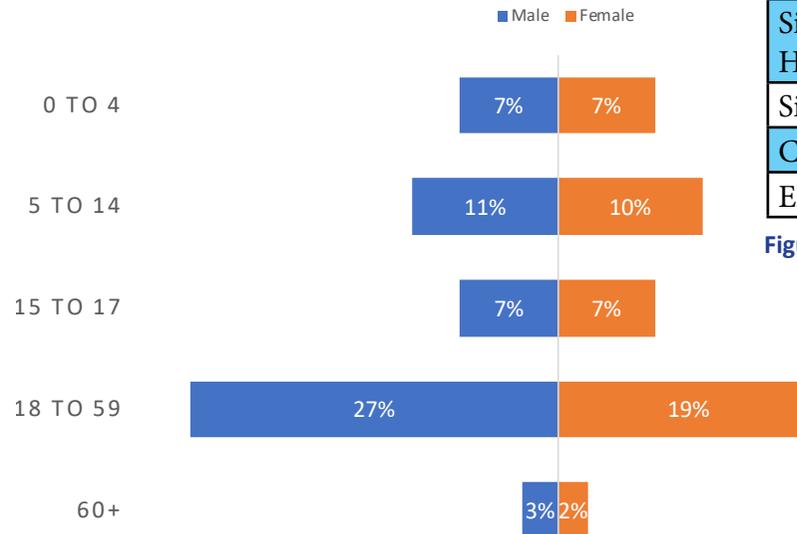

Figure 7: Demographic breakdown

Special Voulnerabilities	# Individuals
Pregnant girls under 18	12
Pregnant Women over 18	468
Breastfeeding Mothers	993
Persons w/ Disabilities under 18	91

## DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION ETHIOPIA ROUND 9: JANUARY - FEBRUARY 2018

### ABOUT DTM

#### DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at [www.globaldtm.info](http://www.globaldtm.info).

#### DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, nine rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

#### METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.
