The DTM Emergency Tracking Tool (ETT) is deployed to track and collect information on large and sudden population movements, provide frequent updates on the scale of displacement and quantify the affected population when needed. As a sub-component of the Mobility Tracking methodology in Nigeria, ETT utilizes direct observations and a broad network of key informants to capture the best estimates of the affected population per location, enabling targeted humanitarian response planning.

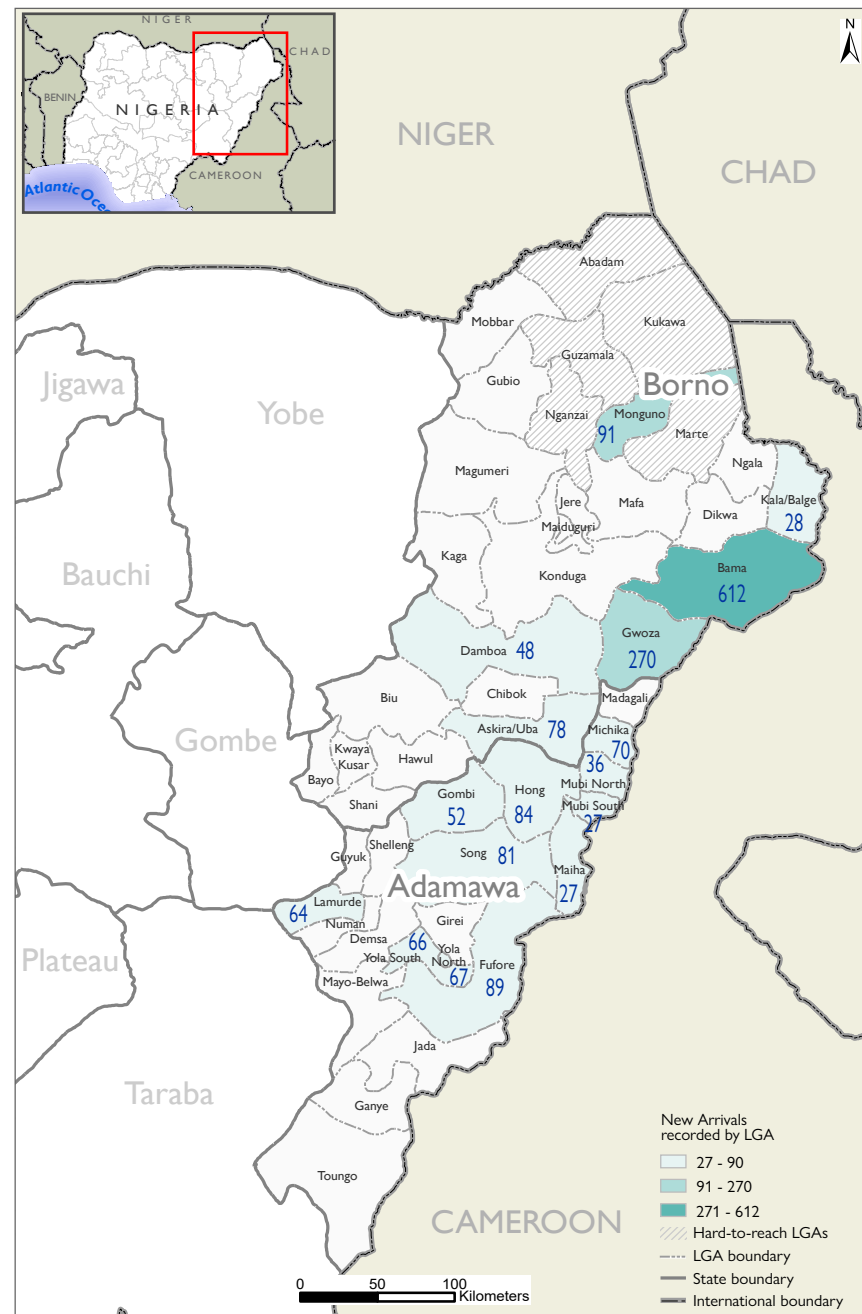

Between 29 May and 4 June 2023, a total of 1,790 new arrivals were recorded at locations in Adamawa and Borno states. The new arrivals were recorded at locations in Askira/Uba, Bama, Damboa, Gwoza, Kala/Balge* and Monguno Local Government Areas (LGAs) of the most conflict-affected Borno State and in Fufore, Gombi, Hong, Lamurde, Maiha, Michika, Mubi North, Mubi South, Song, Yola North and Yola South LGAs of Adamawa State.

ETT assessments identified the following movement triggers: military operations (561 individuals or 30%), seasonal farming (352 individuals or 19%), poor living conditions (324 individuals or 17%), improved security (318 individuals or 17%), access to humanitarian support (91 individuals or 5%), fear of attacks (66 individuals or 3%), flood (52 individuals or 3%) and family re-unification (26 individuals or 1%).

MALNUTRITION SCREENING SUMMARY OF THE NEW ARRIVALS (CHILDREN 6 — 59 MONTHS)

Between 29 May and 4 June 2023, an exhaustive nutrition screening using Mid-Upper Arm Circumference (MUAC) and oedema for acute malnutrition was conducted by sector partners for 315 children of 6-59 months. Of the 315 children screened, the MUAC reading indicated that 15 children were recorded in the red category, 30 children in the yellow category and 270 children in the green category. No case of oedema was reported in the five LGAs assessed.

Among the 315 children screened, 65 children arrived from neighbouring countries (4 in Gwoza LGA, 1 in Kala/Balge LGA, 5 in Monguno LGA and 55 in Mobbar LGA); of all the 65 children measured; 61 were in green, three were in yellow and one was in the red. All children found with acute malnutrition have been admitted in the treatment programme.
