

KEY MESSAGES

- This week witnessed significantly reduced numbers of new arrivals and a spike in exits. 136 IDPs were recorded arriving in Baidoa this week, the fewest number of new arrivals ever recorded in one week. These decreases were attributed to the slow movements of IDPs to Baidoa due to the onset of rainy seasons currently being experienced in the region. 112 individuals were recorded exiting the town, the most exits recorded in one week since last week of November 2017. The key drive factors for displacements in to Baidoa were prolonged drought and insecurity at the village of origin, while those leaving cited management of their farms since the Gu seasonal rains had begun in their villages of origin.
- As for why IDPs were entering Baidoa this week, all the new entries cited either food (57%), insecurity (38%) or access to health (5%) as the key driving factors for displacement into the IDP sites in Baidoa.
- As reported in this week, (100%) of those entering came from the district of Baidoa. They were heading to the IDP sites of Eesaw (46%), Matallamin (33%) and Sarmandhere (21%).
- All of the exits this week said that they were leaving to manage their farms, since the Gu seasonal rains had begun their villages of origin. (76%) of those exiting were from the IDP site of Doolow and the remainder exiting from the IDP site of Cadey (24%). All were returning to Baidoa District of Bay region (100%). Half of the families who exited this week said that they intend to return to the IDP sites in Baidoa

METHODOLOGY

Movement Trend Tracking (MTT) is a movement monitoring exercise that tracks people who are moving in or out of sites on a semi-permanent or permanent basis. MTT aims to gauge the pulse of movements in and out of sites in Baidoa.

MTT figures should not be considered official updates to the population figures of the sites. Rather, the data represents the intentions of IDPs and points towards general trends in their movements.

In Baidoa, IOM enumerators are positioned at the 3 main checkpoints in and out of town (shown on the map on the right) from 6:30am until 5:30pm, 7 days a week.

From these checkpoints, the teams identify people who are moving in or out of Baidoa with luggage. Interviews are done with the individual or the head of household.

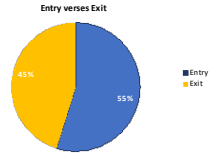

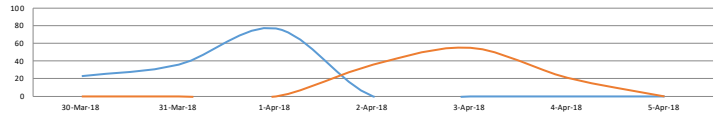

MTT aims to complement existing information management products on displacements and movements in Baidoa, by providing site level specific data on population movements on a regular basis, to assist agencies operating in sites and settlements with key information on: demographics of movement, area of origin, area of return/onward movement, reasons for movement and movement trends over time.

IOM MTT enumerators identify new arrivals and conduct interviews with the heads of household. Photo credit IOM.
