IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 02 and 08 July 2023, IOM Yemen DTM tracked 34 households (204 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 82 per cent (28 HHs) of the total and followed by economic reasons related to conflict, accounting for 18 per cent (6 HH).

From 1 January to 08 July 2023, IOM Yemen DTM tracked 3,551 households (HH)³ (21,306 Individuals) who experienced displacement at least once.

IOM DTM also recorded 6 returnee households in the governorate of Al Hodeidah returning to their locations of origin during the reporting period.
