

**DISPLACEMENT TRACKING MATRIX (DTM) SOMALI, ETHIOPIA
ROUND 10: MARCH/APRIL 2018**

Summary of key findings

DATE OF PUBLICATION: 4 MAY 2018

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI, ETHIOPIA ROUND 10: MARCH/APRIL 2018

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION, ETHIOPIA

ROUND 10: MARCH - APRIL 2018

SOMALI REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

764,145 displaced individuals comprising 127,299 households in 347 displacement sites were identified in SOMALI region*. These figures represent a decrease of 68,507 in the total individuals (-8.23%) a decrease of 621 households (-0.49%) and an increase of 9 sites (+2.66%) since round 9 (January/February 2018). 67.72% sites opened in 2017 and 2.02% opened in 2018. Conflict was the primary cause of displacement for an estimated 56% of the displaced population.

DEMOGRAPHICS: 51% of displaced individuals were female and 49% were male. 61% were younger than 18 years old and 9% were over 60 years old.

SHELTER: 297 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: Only 5 sites meet SPHERE standards of access to over 15 liters of water per person per day. 246 (71%) displacement sites reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 62 (18%) sites, representing 177,932 individuals, reported no access to food. 92% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Pneumonia was the primary health concern in this round of data collection with 130 sites reporting this.

EDUCATION: In 118 sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 240 sites. Alternative basic education (ABE) is available at 123 sites.

COMMUNICATION: 135 sites reported that authorities were the primary providers of information followed by site management at 104 sites.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

* 3 sites were inaccessible during this round and information taken from previous rounds.

Figure 1: IDP individuals by year of displacements

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION, ETHIOPIA ROUND 10: MARCH - APRIL 2018

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

At 7 of the 347 sites new IDP arrivals were recorded in 2018. At the remaining 340 sites no new IDPs had arrived in 2018. At 235 sites new arrivals were recorded in 2017 and at 105 sites the last new arrivals were recorded before 2017.

2% of all sites opened in 2018, 68% opened in 2017 and 30% before 2017.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

57% of IDPs are reported as being displaced within their region of origin and 52% are displaced within the zone of origin.

Less than 1% (2,756) IDPs had reportedly been previously displaced. IDPs from 31 (9%) sites were leaving the site. Of these, IDPs from 19 sites were going to the nearest village and IDPs from 2 sites intended to return to their place of origin.

Figure 3: IDPs displaced by zone and cause of displacement

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

Duration	Conflict Induced	Climate Induced
Before 2017	203,881	67,492
During 2017	166,529	271,815
In 2018	54,428	0

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION, ETHIOPIA

ROUND 10: MARCH - APRIL 2018

DURABLE SOLUTIONS, VOULNERABILITIES AND DEMOGRAPHICS

At 33 % of sites IDPs foresaw a resolution to their displacement, while IDPs at 43 % of sites did not. At the remaining sites key informants either did not know (23 %), or were not asked the question in a previous round.

At 99.71% of sites IDPs prefer reintegration as a durable solution to their displacement while at 0.29% sites they prefer return. No sites reported that IDPs preferred a specific location.

Figure 5 shows the percentage of sites reporting various obstacles to returns, while figure 6 shows support IDPs need to return or reintegrate.

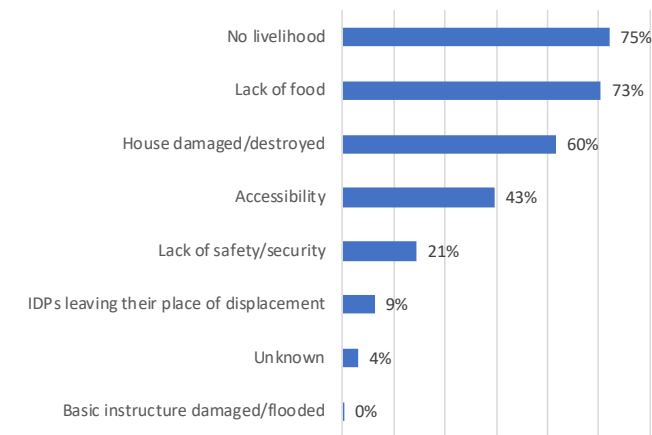

Figure 5: % Sites reporting obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

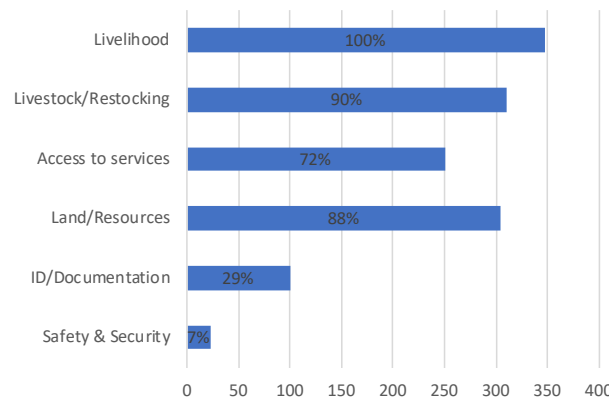

Figure 6: % Sites by support needed to return or reintegrate

Figure 7: Demographic breakdown

Special Vulnerabilities	# Individuals
Breastfeeding Mothers #	23066
Child headed Households	946
Elderly headed Households	4627
Elderly Persons without care givers	2949
Members of ethnic minorities #	0
Members of religious minorities #	0
Orphaned Children	3250
Persons w/ Chronic Diseases/Serious Medical Conditions	873
Persons w/ Disabilities # over 18	1716
Persons w/ Disabilities # under 18	1347
Pregnant girls # under 18	814
Pregnant Women # over 18	14873
Separated Children	1408
Single-female headed Households	3881
Single-male headed Households	2212
Unaccompanied Children	564

DISPLACEMENT TRACKING MATRIX (DTM) SOMALI REGION, ETHIOPIA ROUND 10: MARCH - APRIL 2018

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, ten rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.
