Note:
The newly created zones and woredas boundaries in this region are not available in our Geodatabase; hence their boundaries and figures are combined with their mother zones and woredas.

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA

ROUND 10: MARCH - APRIL 2018

TIGRAY REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT: 30,112 displaced individuals comprising 10,892 households in 78 displacement sites were identified in TIGRAY region. These figures represent an increase of 7,624 in the total individuals (+33.90%) an increase of 2,951 households (+37.16%) and 18 sites (+30.00%) since round 9 (January/February 2018). 73% sites opened before 2017, 10% sites opened in 2017 and 17% opened in 2018. Conflict was the primary cause of displacement for an estimated 95% of the displaced population.

DEMOGRAPHICS: 45% of displaced individuals were female and 55% were male. 47% were younger than 18 years old. 4% were over 60 years old.

SHELTER: 1 site reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: Only 2 sites meet SPHERE standards of access to over 15 liters of water per person per day. 18 (23%) displacement sites reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 15 (19%) sites, representing 2453 individuals, reported no access to food. 90% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Pneumonia was the primary health concern in this round of data collection with 26 sites reporting this.

EDUCATION: In 12 sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 77 sites. Alternative basic education (ABE) is available at 1 site.

COMMUNICATION: 55% of sites reported that authorities were IDPs primary source of information followed by local leaders at 41% of sites.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

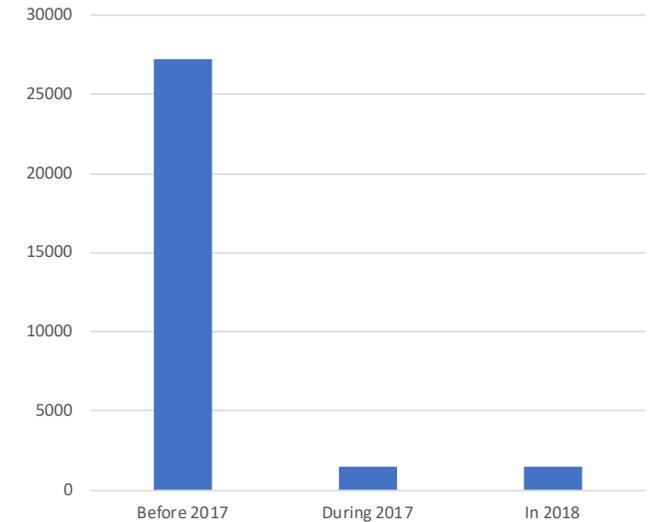

Figure 1: IDP individuals by duration of displacements

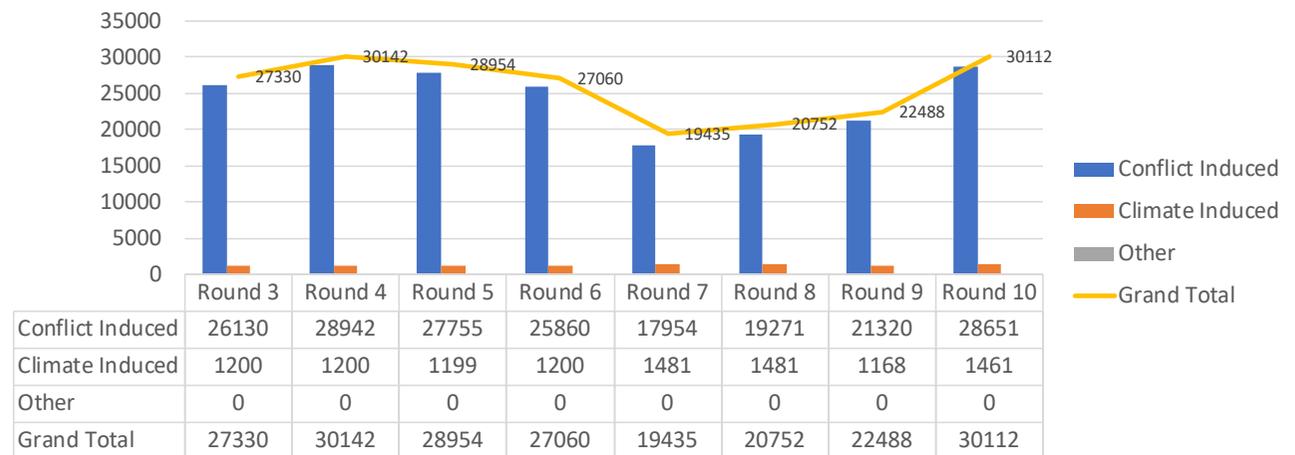

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA ROUND 10: MARCH - APRIL 2018

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

At 13 of the 78 sites, new IDP arrivals were recorded in 2018. At the remaining 65 sites no new IDPs had arrived in 2018. At 8 sites new arrivals were recorded in 2017 and at 57 sites the last new arrivals were recorded before 2017.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

28% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 28% were displaced within their zone of origin.

4% (1168), IDPs had reportedly been previously displaced. IDPs from 1 site were reported as leaving the site and going to the nearest village.

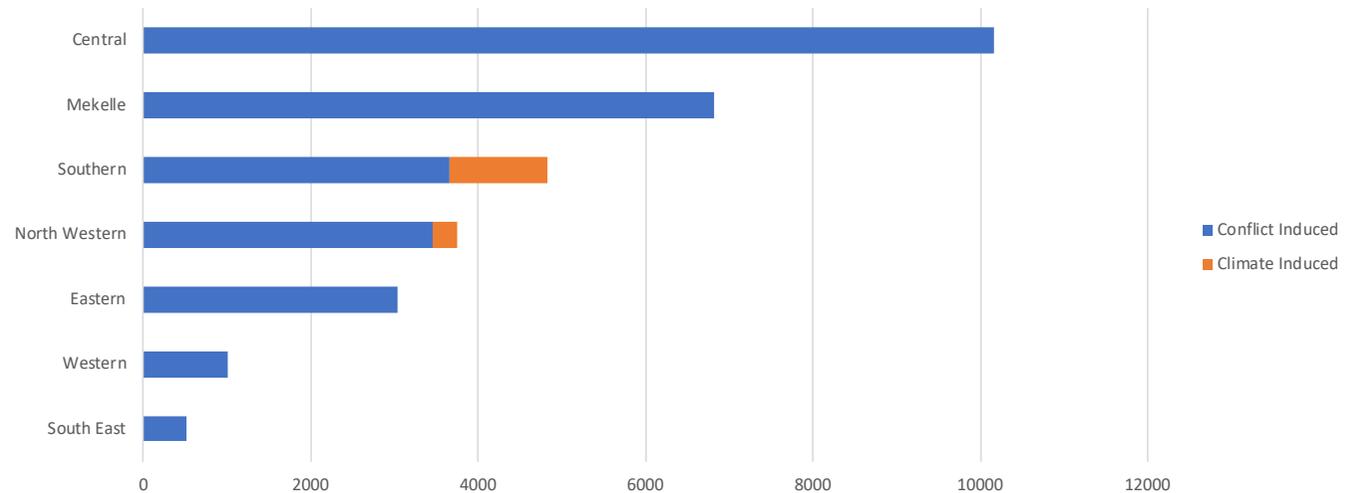

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict Induced	Climate Induced
Before 2017	26,500	723
During 2017	1,013	445
In 2018	1,138	293
Total	28,651	1,461

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA ROUND 10: MARCH - APRIL 2018

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

At 96% of sites IDPs foresaw a resolution to their displacement. At the remaining sites key informants either did not know (4%), or were not asked the question in a previous round.

At 86% of sites IDPs preferred reintegration as a durable solution to their displacement while at 1% sites they preferred return. At 13% sites IDPs preferred relocation.

Figure 5 shows the percentage of sites reporting various obstacles to returns, while figure 6 shows support IDPs need to return or reintegrate.

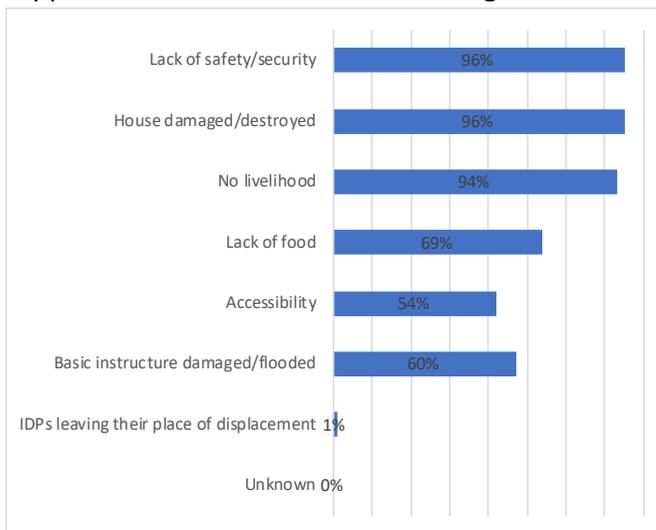

Figure 5: % Sites reporting obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

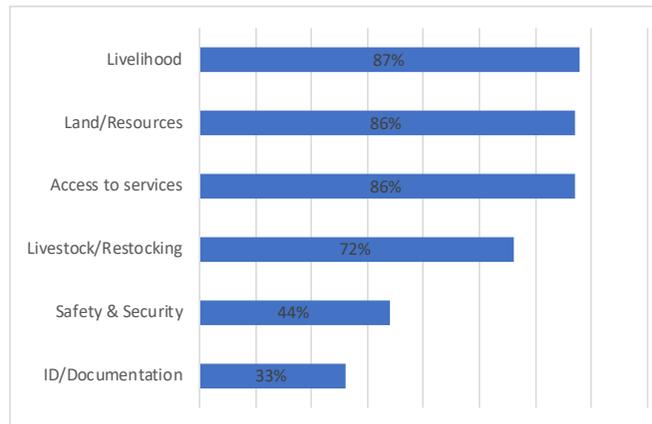

Figure 6: % Sites by support needed to return or reintegrate

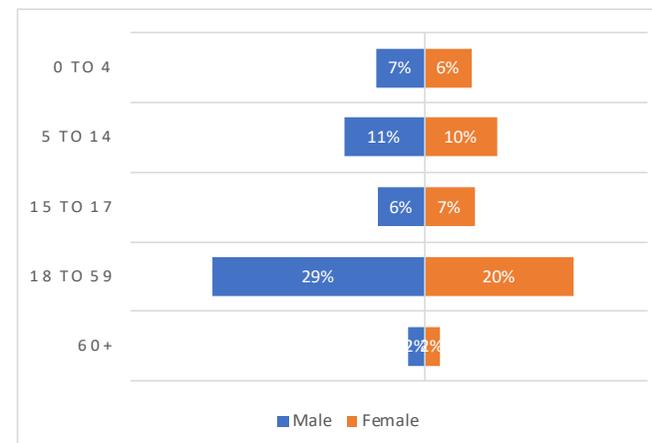

Figure 7: Demographic breakdown

Special Vulnerabilities	# Individuals
Breastfeeding Mothers #	1,311
Child headed Households	9
Elderly headed Households	541
Elderly Persons without care givers	207
Members of ethnic minorities #	0
Members of religious minorities #	0
Orphaned Children	110
Persons w/ Chronic Diseases/Serious Medical Conditions	309
Persons w/ Disabilities # over 18	271
Persons w/ Disabilities # under 18	116
Pregnant girls # under 18	12
Pregnant Women # over 18	553
Separated Children	93
Single-female headed Households	1,061
Single-male headed Households	2,252
Unaccompanied Children	8

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA ROUND 10: MARCH - APRIL 2018

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, ten rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.
