

# MOBILITY SNAPSHOT – Round 4

Report Production Date: 19 October 2023 | Data collected up till 1600h 17 October 2023

## Overview

Since October 8th there has been an increase in cross-border incidents between Israel and Lebanon, resulting in the displacement of people both within the South and elsewhere within the country. Since October 10th, the Displacement Tracking Matrix (DTM) has been conducting the daily monitoring of population movements. The objective of the exercise is to inform preparedness and response planning.

## Methodology

Data is frequently collected on the presence of internally displaced persons (IDPs), including the area of displacement and the area of origin. This process is part of developing a comprehensive IDP baseline in line with the [DTM Global Methodological Framework](#).

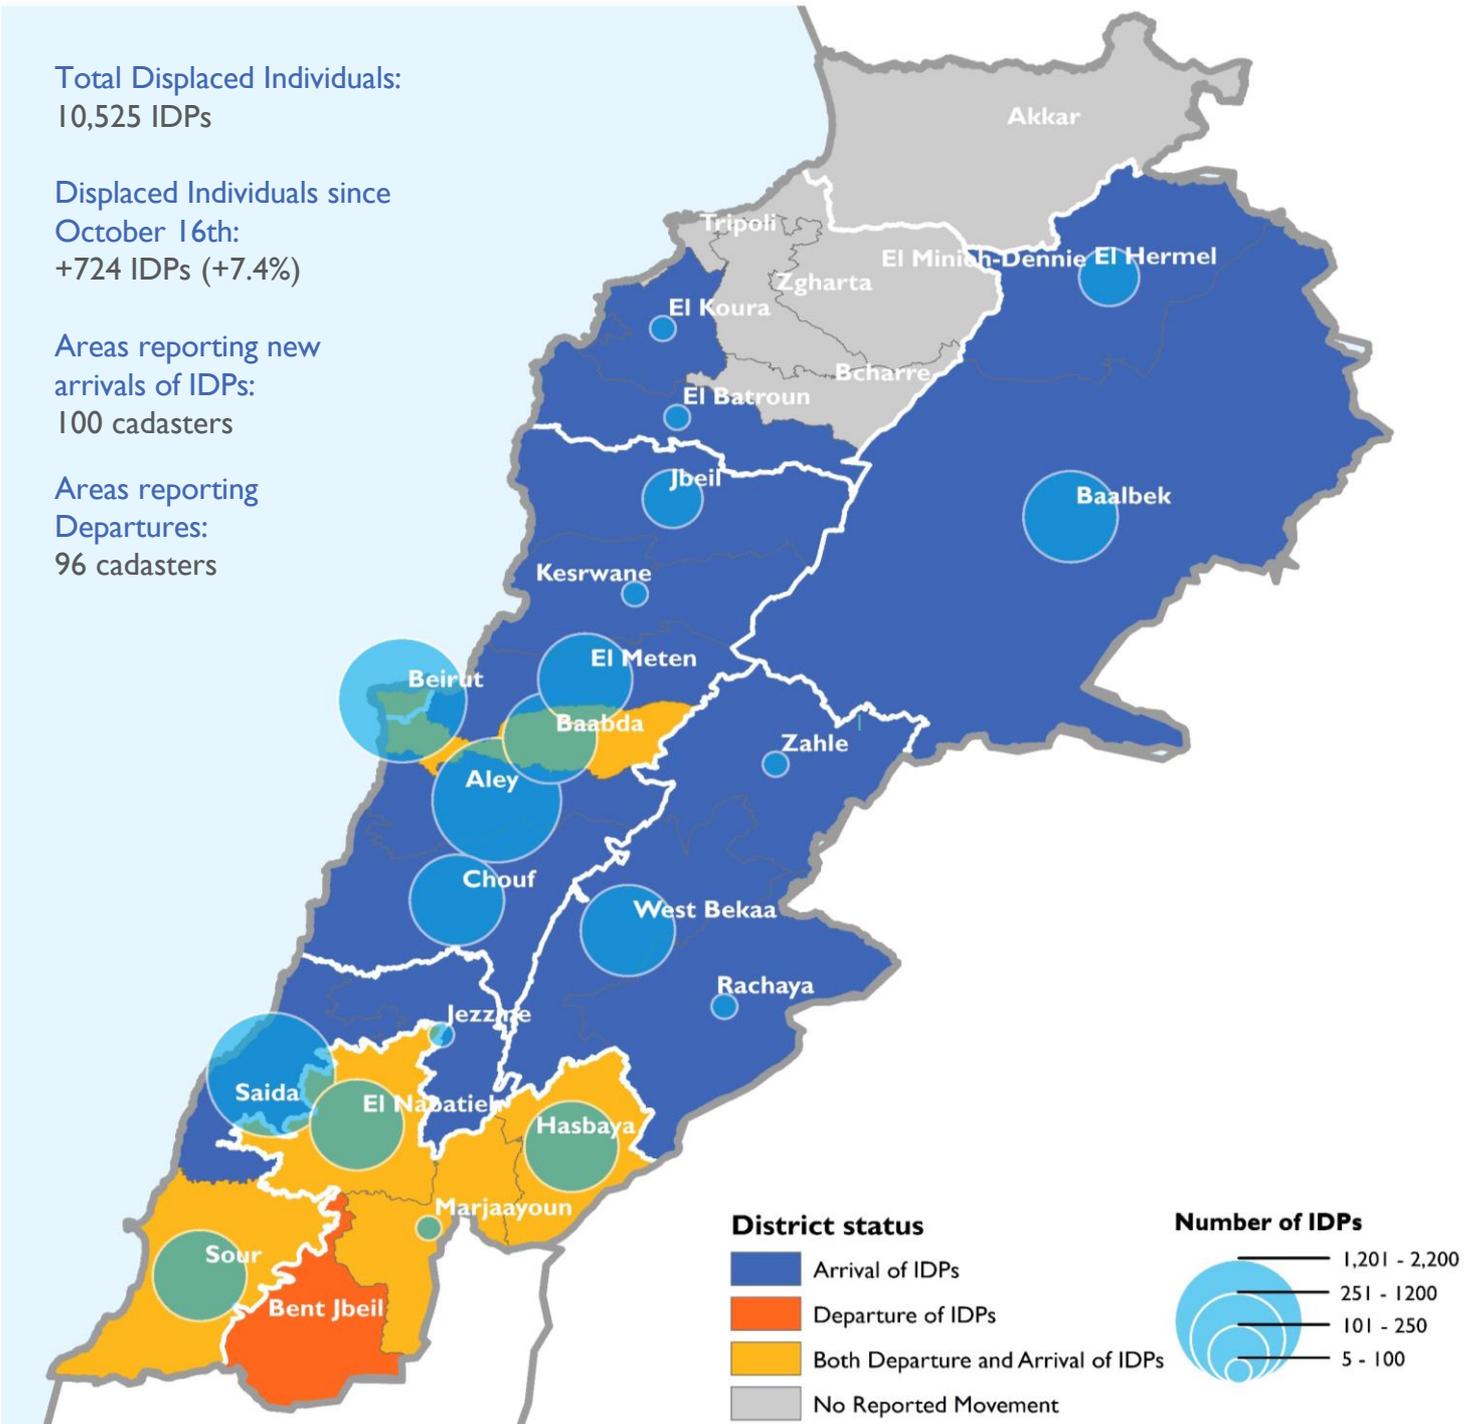

The DTM is using a network of over 3,600 key informants across the country to provide localized numbers on displacement and departures. The Key informants consist of Government officials, Mukhtars, migrant community representatives and neighborhood focal points.

**Total Displaced Individuals:**  
10,525 IDPs

**Displaced Individuals since October 16th:**  
+724 IDPs (+7.4%)

**Areas reporting new arrivals of IDPs:**  
100 cadasters

**Areas reporting Departures:**  
96 cadasters
