1,683 Returnee HHs

A huge number of HHs displaced due to cyclone Tej in the eastern governorates Al Maharah and Hadramawt in the previous report.

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 29 October and 4 November 2023, IOM Yemen DTM tracked 15 households (HHs) (90 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 67 per cent (10 HHs) of the total followed by economic reasons related to conflict, accounting for 33 per cent (5 HHs).

From 1 January to 4 November 2023, IOM Yemen DTM tracked 9,273 households³ (55,638 Individuals) who experienced displacement at least once.

IOM DTM also recorded 1,683 returnee households who were displaced by cyclone Tej last week in the governorates of Al Maharah (1,415HHs), Hadramawt (262 HHs), and Ma'rib (6 HHs) returning to their locations of origin during the reporting period.
