IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 5 and 11 November 2023, IOM Yemen DTM tracked 29 households (HHs) (174 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 55 per cent (16 HHs) of the total followed by economic reasons related to conflict, accounting for 45 per cent (13 HHs).
