IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 12 and 18 November 2023, IOM Yemen DTM tracked 37 households (HHs) (222 individuals)² who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 65 per cent (24 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 35 per cent (13 HHs).

From 1 January to 18 November 2023, IOM Yemen DTM tracked 9,405 households³ (56,430 Individuals) who experienced displacement at least once.

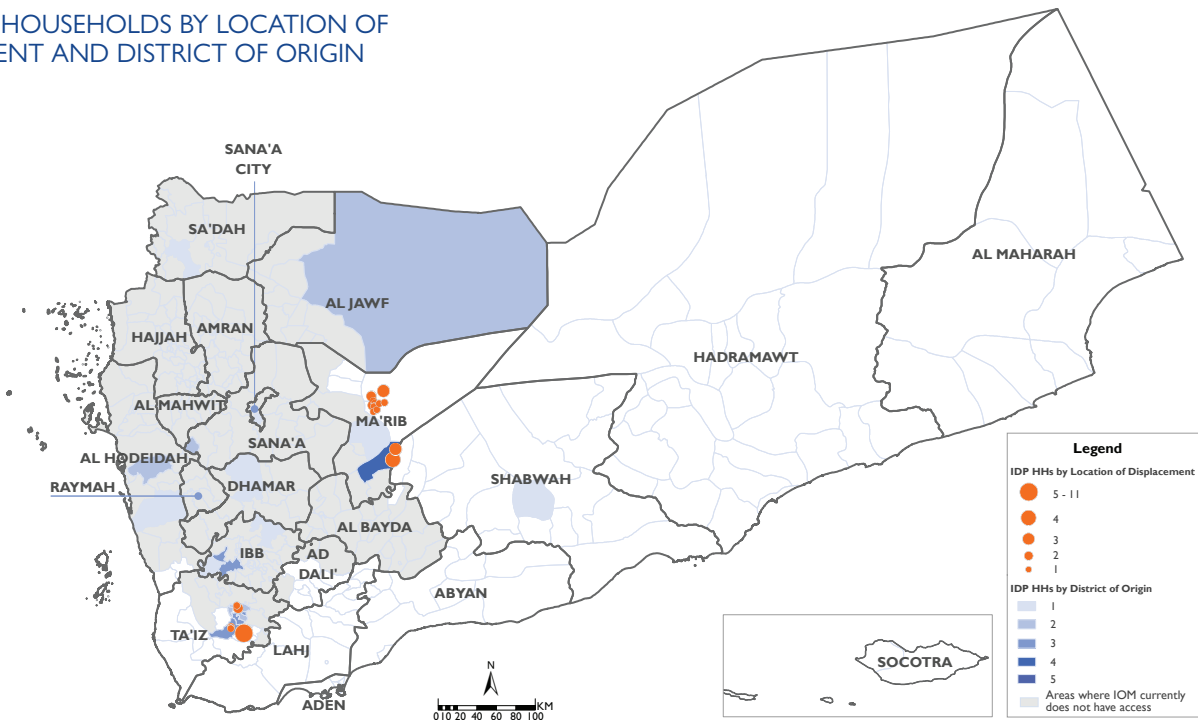

IOM DTM also recorded 6 returnee households in Ma'rib (4 HHs) and Ta'iz (2 HHs) governorates returning to their locations of origin during the reporting period.
