

## KEY MESSAGES

- A total of 192 entries and zero exit were recorded in Dolow IDPs camps. The number of entries has been increasing due ongoing fighting in Ethiopia and also SCOPE registration in Dolow IDPs camps.
- The majority of the new arrivals this week cited lack of food as their reason for displacement (54%), insecurity (25%) and uncomfortable condition (21%).
- More than two-third of the new arrivals came from across the border, Ethiopia (75%) and nearby districts of Belet xaawo (21%) and Luuq (4%).
- All the new arrivals went to Qansaxley IDP site.

INTERVIEWING IDPs arriving

## METHODOLOGY

Movement Trend Tracking (MTT) is a movement monitoring exercise that tracks people who are moving in or out of sites on a semi-permanent or permanent basis. MTT aims to gauge the pulse of movements in and out of sites in Dolow.

MTT figures should not be considered official updates to the population figures of the sites. Rather, the data represents the intentions of IDPs and points towards general trends in their movements.

In Dolow, IOM enumerators are positioned at the 2 main IDP sites, Kabasa and Qansaxley, 7 days a week from sunrise to sunset. The teams identify people who are moving in or out of the sites with luggage. Interviews are done with the individual or the head of household.

MTT aims to complement existing information management products on displacements and movements in Dolow, by providing site level specific data on population movements on a regular basis, to assist agencies operating in sites and settlements with key information on: demographics of movement, area of origin, area of return/onward movement, reasons for movement and movement trends over time.
