IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 26 November and 2 December 2023, IOM Yemen DTM tracked 47 households (HHs) (282 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 74 per cent (35 HHs) of the total followed by economic reasons related to conflict, accounting for 26 per cent (12 HHs).

From 1 January to 2 December 2023, IOM Yemen DTM tracked 9,643 households³ (57,858 Individuals) who experienced displacement at least once.

IOM DTM also recorded 6 returnee households in Ta'iz (4 HHs) and Ma'rib (2 HHs) governorates returning to their locations of origin during the reporting period.
