DISPLACEMENT TIMELINE BASED ON REPORTED DATE

Methods and Limitations:

- IOM uses the Emergency Tracking Tool to compile daily information from various partners including: local and international NGOs, and local and national authorities. Compilation is done through document review, as well as personal and/or phone interviews.
- Where IOM has direct access, IOM field teams verify information provided by partners through visual observation, review of individual registries and key informant interviews. To date, IOM has verified 16% (8,050HH) of the reported figures.
- IOM currently has direct access in: Aden, Taizz, Lahj, Al Dhale'e, Abyan, Shabwah, Hadramaut, Al Mahara, Ibb, Albayda and Al Jawf.
- Thus far in Sa'ada, Hajjah, Amran, Al Mahwit, Al Hudaydah, Raymah, Dhamar, Sana'a, Amanat al Asimah, and Marib, IOM relies on checks completed by field partners to confirm, or provide alternative figures. IOM- DTM will have increased access to the above governorates in the coming weeks, and will make continued efforts to understand displacement dynamics in Yemen.
