

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements as well as security and climatic emergencies. Information is collected through phone interviews with key informants and direct observation.

### Origins and host locations of displaced persons

This map is for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

### Event Summary

On December 18th, an armed attack occurred in downtown Ganthier, specifically in the 5th communal section of Pays Pourri, which is situated within the municipality of Ganthier.

As a consequence of this incident, approximately **388 households**, **totaling 1,940 individuals**, have been displaced within the same municipality.

Currently, these displaced individuals have sought refuge with host families, with the majority finding shelter in the communal section of Fond Parisien.

**388** Displaced households

**1,940** Displaced individuals

### Methodology

	Assessment conducted in affected areas	
	Assessment conducted through phone interviews with key informants	

### Limits

The information presented in this report may not represent all displacements caused by this incident. Indeed, it is possible that some displacements were not detected by key informants. In the case new displacement information caused by this incident is reported, updates can be made accordingly.

Furthermore, it is important to consider that figures are estimates and not data from a counting or registration of displaced households.
