These include 179 arrivals at Monguno town (103 individuals), GDSS Camp (45 individuals) and GSSSS Camp (31 individuals) from Gudumbali ward of Guzamala LGA, and 67 arrivals at Water-Board Camp from Mairari ward of Guzamala LGA. The movements were triggered by recent conflict in Guzamala LGA.

IOM's Emergency Tracking Tool (ETT) is deployed in Nigeria's northeastern states. Only Local Government Areas (LGAs) in which the IDP population changed since the latest DTM round of assessments are represented in this report. The data has been collected by DTM staff deployed at the locations listed and cross-checked with the partners present on the ground.

New Arrival Malnutrition Screening Summary (children 6-59 months)

An exhaustive nutrition screening using mid upper arm circumference (MUAC) and signs of Oedema was conducted by Sector partners for 208 children. Of the 208 children screened, the MUAC reading for 35 children (30 from inaccessible and 5 from accessible areas) was in the Red category, 34 were in the Yellow category and 139 were measured in the Green category. No case of Oedema was reported in any of the 7 LGAs where screening was conducted.

This result also covers 26 children from neighbouring countries (9 screened at Mobbar LGA and 17 screened at Ngala LGA); out of which 20 children were in the Green category, 4 in Yellow and 2 in the Red category.

All children found with severe acute malnutrition have been admitted for treatment.

Please note, the data presented are not surveillance results and should be interpreted with caution.
