43% increase in displacement from the previous week (21 HHs)

2 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 28 January and 3 February 2024, IOM Yemen DTM tracked 30 households (HHs) (180 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 83 per cent (25 HHs) of the total followed by economic reasons related to conflict, accounting for 17 per cent (5 HHs).

From 1 January to 3 February 2024, IOM Yemen DTM tracked 341 households³ (2,046 Individuals) who experienced displacement at least once.

IOM DTM also recorded two returnee households in governorates of Ma'rib returning to their locations of origin during the reporting period.
