

## OVERVIEW

In response to recent movements, IOM Afghanistan re-launched its DTM Flow Monitoring activity at the beginning of 2024 to better understand the mobility dynamics at Afghanistan's borders. Since 10 January 2024, DTM has deployed field teams at four border crossing points with the Islamic Republic of Iran (IRN) and Pakistan (PAK) (see map below) to conduct two interlinked exercises. The first is a headcount of all individuals entering or leaving Afghanistan (including returnees), also called Flow Monitoring Counting (FMC), to gauge flow volume. The second is a survey of randomly selected Afghan national individuals or groups entering or leaving Afghanistan, also called the Flow Monitoring Survey (FMS), to understand the profiles, motivations, and vulnerabilities of the target population. This snapshot provides key findings combining various IOM data sources, including DTM Afghanistan's FMC and FMS activities, DTM Pakistan's Flow Monitoring of Afghan returnees, and IOM Afghanistan's Cross-Border Post-Arrival Humanitarian Assistance (CB-PAHA) program, for the period 4 to 10 February 2024. For more information about methodology, see the the section in the last page of this report titled "IOM INFLOWS."

**50,388** TOTAL INFLOWS

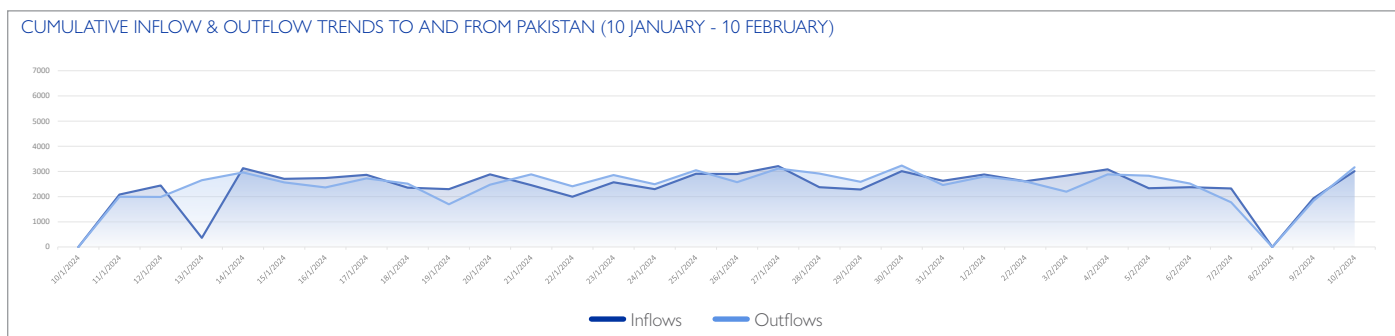

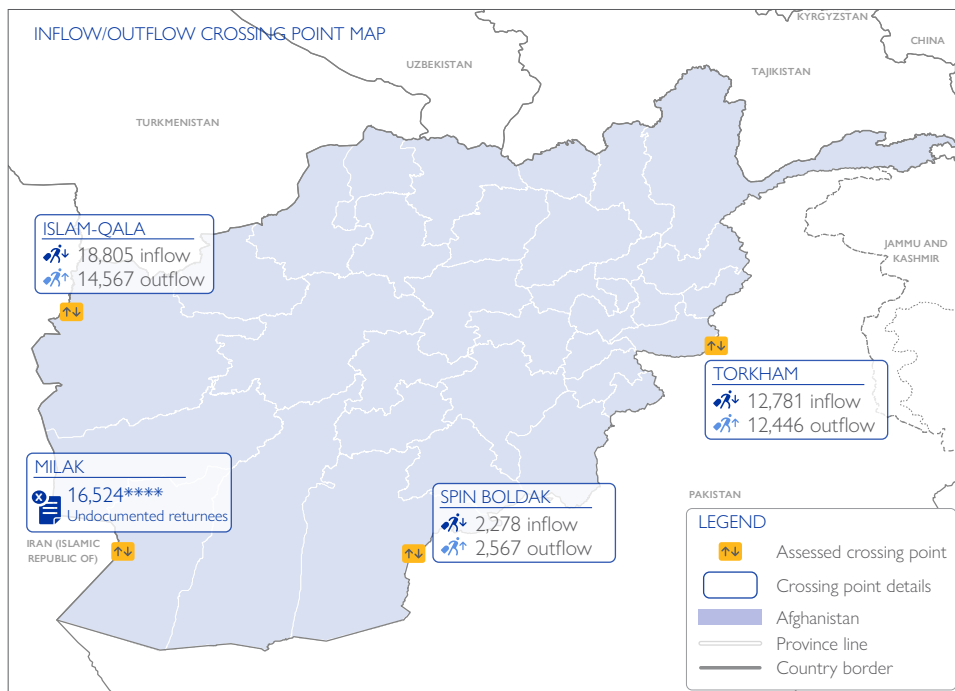

### KEY INFLOW FIGURES BY BORDER COUNTRY\*

	IRN	PAK
Total inflows	35,329	15,059
Documented returnees	NOT AVAILABLE	168**
Undocumented returnees	24,509***	952***
Assisted by IOM	5,716***	886***

**29,580** TOTAL OUTFLOWS

### OUTFLOW FIGURES BY BORDER COUNTRY\*\*\*\*

	IRN	PAK
Total outflows	14,567	15,013

DISCLAIMER: These maps are for illustration purposes only. The boundaries and names shown and the designations used on these maps do not imply official endorsement or acceptance by the International Organization for Migration.

\* More information on the methodology of collecting data on different subsets of inflow groups can be found on the last page of this report in the section titled "IOM INFLOW DATA."

\*\* Documented returnees include Proof of Registration (PoR) holders. Source: IOM DTM Pakistan and UNHCR Pakistan

\*\*\* This data is collected by IOM CB-PAHA. Individuals receive post-arrival assistance from IOM and support from Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>

\*\*\*\* No data collection due to operational suspensions, the undocumented returnees data collected by IOM CB-PAHA.

\*\*\*\*\* DTM Afghanistan does not collect data on subsets of outflow groups.

## INFLOWS

FMC TOTAL INDIVIDUALS: 50,388

FMS TOTAL RESPONDENTS: 3,163

The following analysis compiles responses from 3,163 total Afghan nationals (2,002 at the border with the Islamic Republic of Iran, 1,161 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups entering Afghanistan.

Entering Afghanistan with the intention to transit to a third country was very uncommon; the intended destination of almost all respondents arriving from the Islamic Republic of Iran or Pakistan was Afghanistan. While movements from Iran were mainly characterized by deportees and those traveling for economic reasons, movements from Pakistan involved voluntary returns and family-related visits. Male respondents arriving from the Islamic Republic of Iran were more likely than female respondents to cite economic reasons for their reason for travel (76% versus 57%, respectively). Meanwhile, female respondents arriving from both the Islamic Republic of Iran and Pakistan were much more likely to respond that they felt unsafe at their origin location (21% and 32%, respectively) compared to male respondents (12% and 10%, respectively).

## OUTFLOWS

FMC TOTAL INDIVIDUALS: 29,580

FMS TOTAL RESPONDENTS: 1,357

The following analysis compiles responses from 1,357 total Afghan nationals (482 at the border with the Islamic Republic of Iran, 875 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups leaving Afghanistan.

Possessing travel documents, including a passport and visa, was relatively common among those leaving Afghanistan. This stands in contrast with the majority of those arriving to Afghanistan, who were not carrying travel documents. The majority of those going abroad reported that this was their first time leaving Afghanistan. Most respondents going to the Islamic Republic of Iran intended to stay there for a year or less, while most going to Pakistan planned shorter trips; the majority intended to stay less than three months. These intentions reflect respondents' reasons for migration. While family-related visits were a common reason to leave Afghanistan for both those going to Pakistan and those going to the Islamic Republic of Iran, accessing healthcare, which can often constitute a shorter visit, was more common among the former, whereas economic motivations, likely related to employment, were more common among the latter.

## IOM INFLOW DATA

DTM Afghanistan, DTM Pakistan, and IOM Afghanistan's Cross Border Post-Arrival Humanitarian Assistance (CB-PAHA) program use different methodologies to collect data on various demographic subsets of individuals entering Afghanistan (inflows). The following flow chart illustrates the relationships between the subsets and how IOM coordinates its various activities and methodologies to develop more robust and comprehensive databases on movements into Afghanistan.

### 1 TOTAL INFLOWS

COLLECTED AT BORDERS WITH PAK AND IRN

DTM Afghanistan counts every individual, regardless of nationality, documentation status, or planned length of stay in Afghanistan, who enters Afghanistan from the Islam Qala, Milak, Spin Boldak, and Torkham border points. This exercise is referred to as Flow Monitoring Counting (FMC). DTM Afghanistan also surveys a random sample of those counted using its Flow Monitoring Survey (FMS) exercise.

### 2 TOTAL NUMBER OF RETURNEES

COLLECTED AT BORDER WITH PAK

DTM Pakistan collects the number of Afghan nationals returning to Afghanistan via the Spin Boldak and Torkham border crossing points. Returnees are classified as Afghans who intend to return and live in Afghanistan for an extended period of time, as opposed to those just travelling for trade or to visit Afghanistan temporarily. There is no similar exercise at the border with the Islamic Republic of Iran.

### 3 TOTAL NUMBER OF DOCUMENTED RETURNEES

COLLECTED AT BORDER WITH PAK

### 4 TOTAL NUMBER OF UNDOCUMENTED RETURNEES

COLLECTED AT BORDERS WITH PAK AND IRN

The number of documented returnees comes from DTM Pakistan data collection. The number of undocumented returnees comes from IOM CB-PAHA data collection.

### 5 TOTAL NUMBER ASSISTED BY IOM

COLLECTED AT BORDERS WITH PAK AND IRN

IOM CB-PAHA assists undocumented Afghan returnees in reception centers located close to the Islam Qala, Milak, Spin Boldak, and Torkham border points.

## DATA ON ASSISTED AFGHAN RETURNEES

IOM Afghanistan's CB-PAHA program collects information on undocumented Afghan returnees who pass through reception centers near the border and receive assistance from IOM and Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>.

### CUMULATIVE TRENDS: NUMBER OF RETURNEES ASSISTED BY IOM (10 JANUARY - 10 FEBRUARY)

#### FROM THE ISLAMIC REPUBLIC OF IRAN

##### ISLAM QALA

##### MILAK

#### FROM PAKISTAN

##### SPIN BOLDAK

##### TORKHAM
