

 **Affected Population:** 452 Individuals
  **Damaged Shelters:** 11
  **Affected Locations:** 2
  **Movement Trigger:** Attack

**OVERVIEW**

The lingering conflict in Nigeria's Northeast region has been the major cause of widespread population displacement. Over two million persons have been forced to leave their areas of residence to other parts of Nigeria in search of safety and security.

Between 20 and 22 January 2024, a non-state armed group (NSAG) carried out attacks in Hausari and Kalallawa/Gabai wards in Geidam and Damaturu LGAs of Yobe State, leading to the displacement of a large number of the affected population. Following the attack, IOM-DTM Nigeria deployed a rapid assessment team to evaluate the immediate needs and vulnerabilities of the affected population with the purpose of informing the humanitarian community and government partners, and enabling targeted response. Flash reports utilise direct observation and a broad network of key informants to gather data and collect information on the number, profile and immediate needs of the affected population.

As a result of the attack, a total of 452 individuals from 79 households were displaced from their homes forcing them to seek refuge in nearby communities or makeshift shelters.
