

December saw an increase in flows recorded in Somalia, with a total of 7,310 individuals recorded for this month (in comparison with 5,383 in November). While outflows remained at similar levels, inflows increased significantly (from 2,710 individuals in November to 4,689 individuals in December). Main points of entry were Buuhoodle (Puntland), Dhobley (Lower Juba), and Diff (Lower Juba); while main points of exit were Diff, Dhobley, and Tulo Barwako (all located in the Lower Juba region). The great majority of movements identified were entries (64%), while solely 36% were exit flows.

TYPE OF FLOW

AGE/SEX DISTRIBUTION

	Children 0 - 17	Adults 18+	Total
	26%	23%	49%
	25%	26%	51%

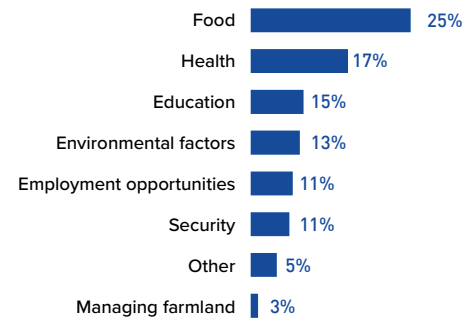

VULNERABILITIES

	Unaccompanied or separated child	0%
	Child or adolescent at risk	1%
	Elder person at risk	2%
	Disabled person	2%
	Serious medical condition	3%
	Woman at risk	3%
	Pregnant	3%
	Single parent	5%
	Special legal and protection needs	7%

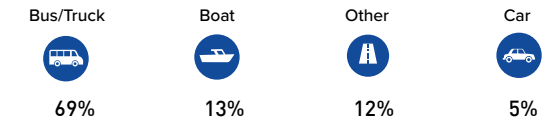

A total of 1,969 vulnerabilities has been reported in December 2017. Vulnerabilities maybe overlapping, hence individuals may have more than one vulnerability

* The percentages are calculated on the total number of persons observed for this month
