IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 25 February and 2 March 2024, IOM Yemen DTM tracked 50 households (HHs) (300 individuals)² who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 52 per cent (26 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 48 per cent (24 HHs).

From 1 January to 2 March 2024, IOM Yemen DTM tracked 637 households³ (3,822 Individuals) who experienced displacement at least once.

IOM DTM also recorded four returnee households in the governorate of Ma'rib returning to their locations of origin during the reporting period.
