Mixed Cross-Border Movement Reporting Date: 10 March 2024

(332) DAYS
From the start of the conflict

70,002 ↑
Displaced Individuals

14,195 ↑
IDP households

18,483 ↑
Mixed Cross-Border Movement

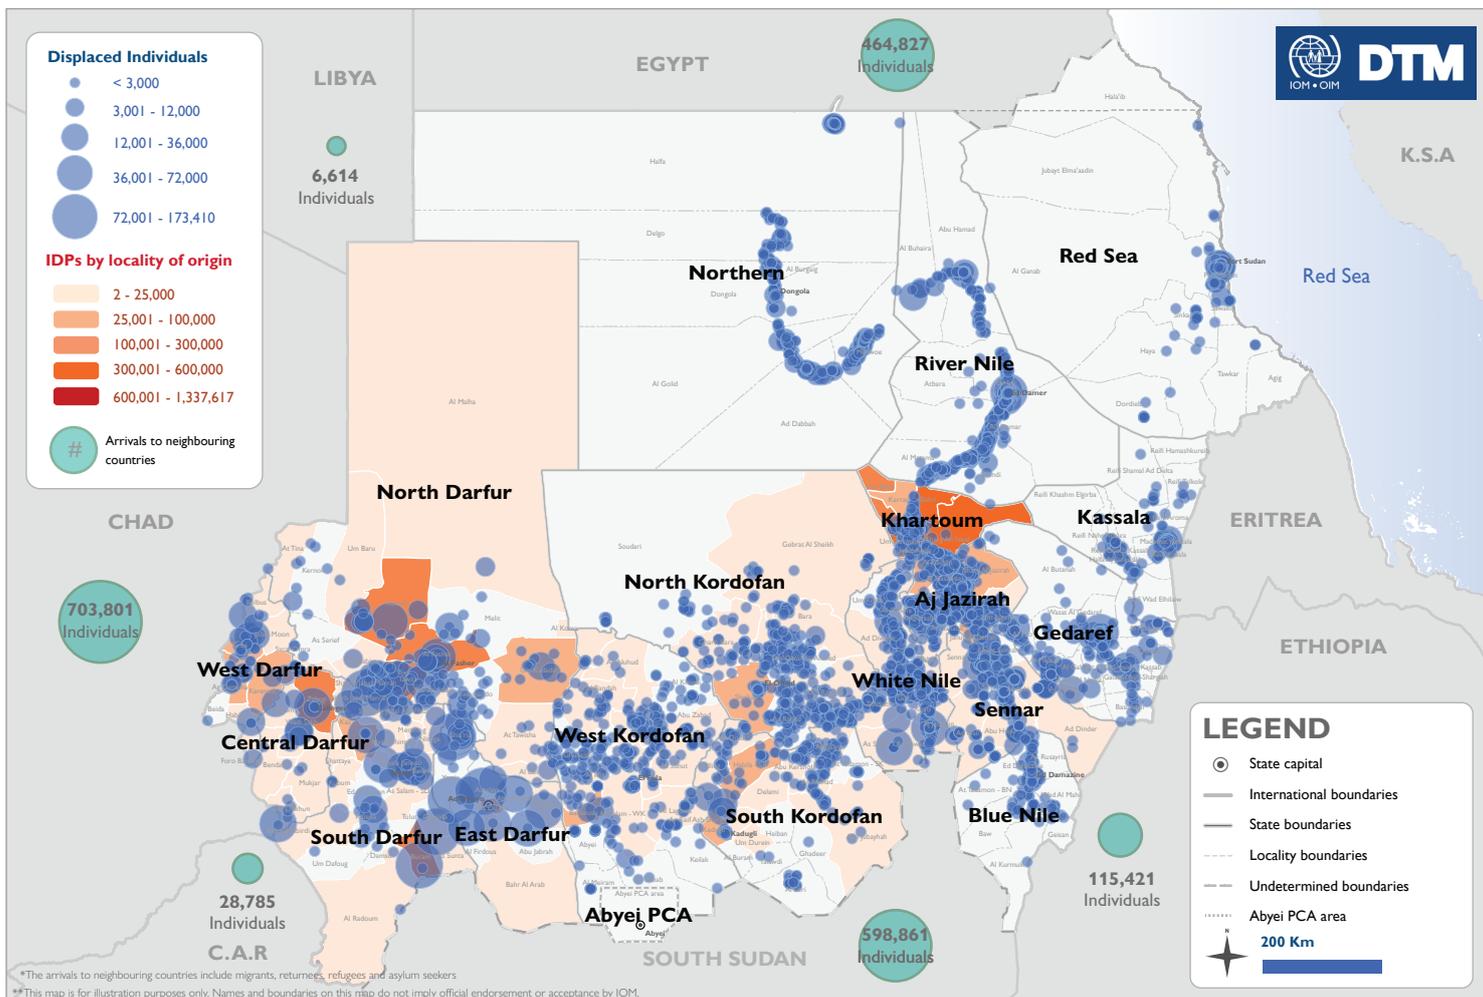

Overview

Since 15 April 2023, on-going armed clashes between the Sudanese Armed Forces (SAF) and the Rapid Support Forces (RSF) have led to widespread displacement. As a result of these clashes, DTM Sudan estimated that 6,467,700 individuals (1,289,341 households) were internally displaced, representing an increase of 70,002 individuals (14,195 households) since DTM Sudan's Weekly Displacement Snapshot 22. The internally displaced persons (IDP) caseload was observed in 6,968 locations across all of Sudan's 18 states.* The highest proportions of IDPs were observed across South Darfur (12%), River Nile (11%), and East Darfur (10%).

Field teams reported that the IDPs were originally displaced from twelve states. As reported, 55 per cent of IDPs were displaced from Khartoum state (3,564,234 IDPs), followed by South Darfur (15%), North Darfur (9%), Aj Jazirah (8%), Central Darfur (5%), West Darfur (4%), South Kordofan (2%), East Darfur (1%), West Kordofan (1%), North Kordofan (1%), Sennar (<1%), and White Nile (<1%).

DTM Sudan also estimated that approximately 2 per cent of the IDP caseload were non-Sudanese nationals.**

In addition to the internal displacement, the conflict in Sudan has caused the Mixed Cross-Border Movements of 1,918,309 individuals into neighbouring countries namely Egypt, Libya, Chad, Central African Republic, South Sudan and Ethiopia. Sixty-three per cent of arrivals tracked in those countries were Sudanese nationals, while an estimated 37 per cent were reportedly foreign nationals. The majority of arrivals were reported in Chad (37%), South Sudan (31%), and Egypt (24%).*** This product provides a brief snapshot of the ongoing displacement across Sudan, post-15 April 2023. For more granular information on the humanitarian and displacement context, please see [DTM Sudan's Monthly Displacement Overview 06](#).

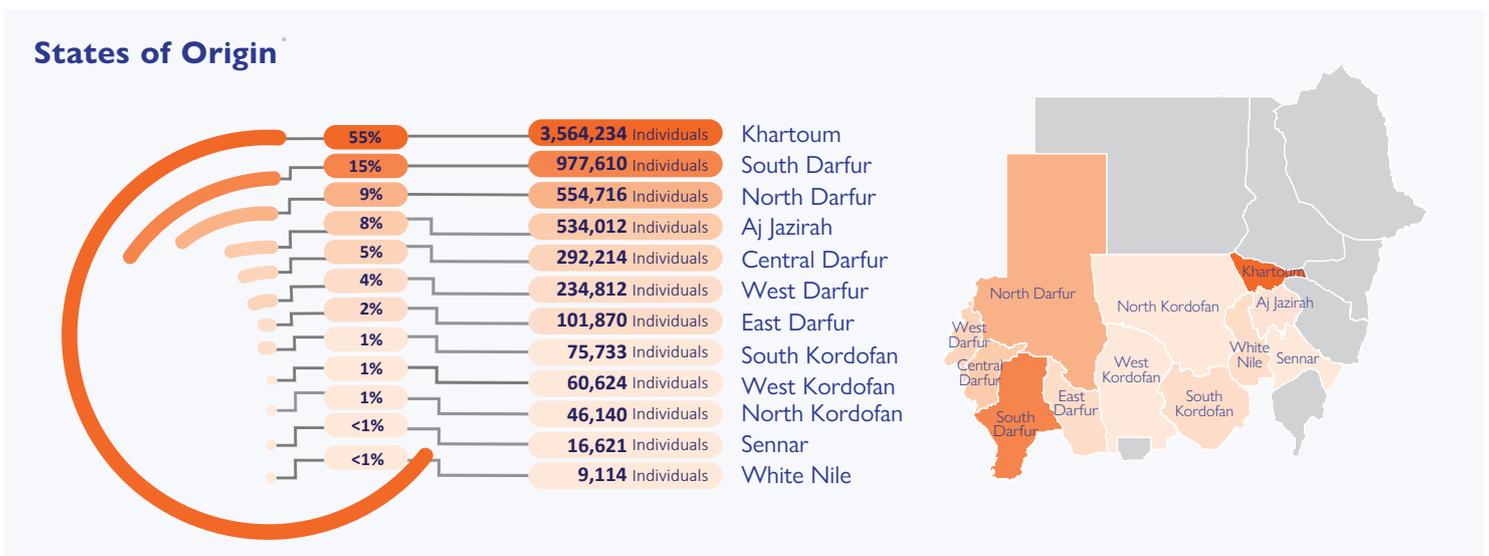

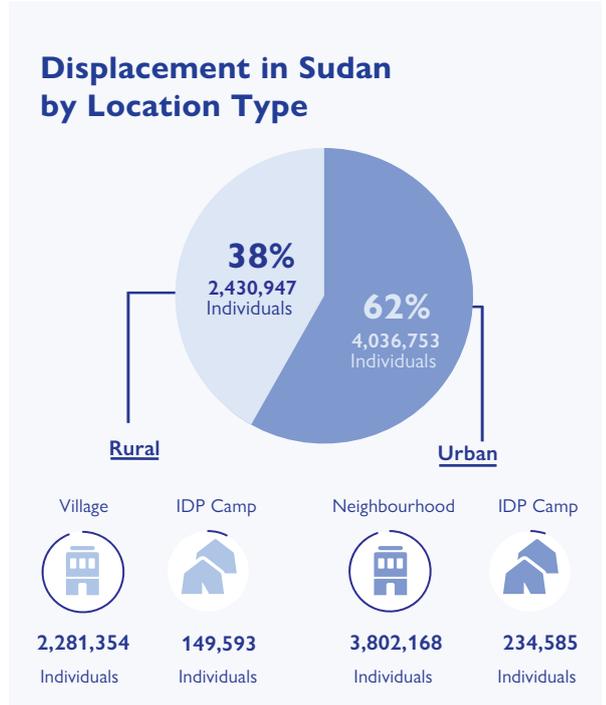

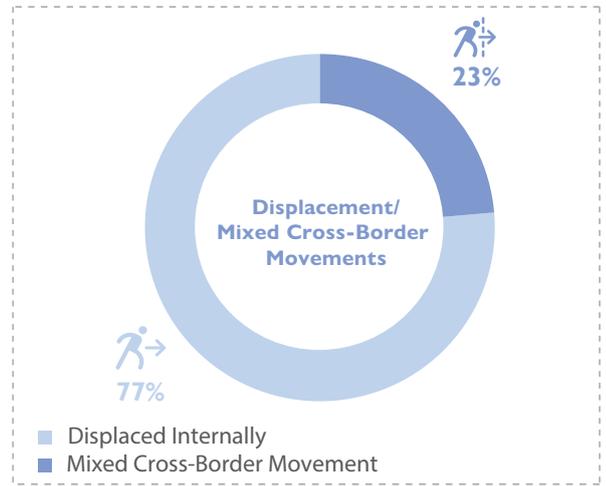

Map 1: Displacement across Sudan and into neighbouring countries since 15 April 2023.

*The data from many locations has been gathered with the co-ordination of the Humanitarian Aid Commission.
 **Field teams collect information on the displacement of foreign nationals in Sudan regardless of whether those individuals have sought international protection or not. Due to the ongoing operational limitations, DTM is currently unable to distinguish between those who sought asylum and are registered as refugee and those who are not.
 ***According to the last available update from the Ministry of Foreign Affairs as of 31 January 2024.

States of Displacement	Snapshot 22 28 Feb 2024	Snapshot 23 6 Mar 2024	Difference	% Total IDPs*	Number of locations
Aj Jazirah	344,846	349,439	4,593 ↑	5%	1,492

Table 1: Overview of displacement by state

Disclaimer: DTM Sudan is a suite of methodological tools which aims to track and monitor displacement. DTM collects primary data, with a focus on providing best estimates for support of the wider humanitarian community. DTM Sudan notes that military clashes remain continuous in many areas across Sudan. As such, DTM is currently collecting data through a dual combination of face-to-face and remote interviews with key informants across its network. Data on flows into neighbouring countries is based on available information from DTM flow monitoring networks and secondary sources. Figures should be treated as preliminary findings only and are subject to change via future verification exercises. Percentages across the report may not equal 100 per cent due to rounding.

*Total may not be 100 per cent due to rounding.

Total Households: 1,289,341

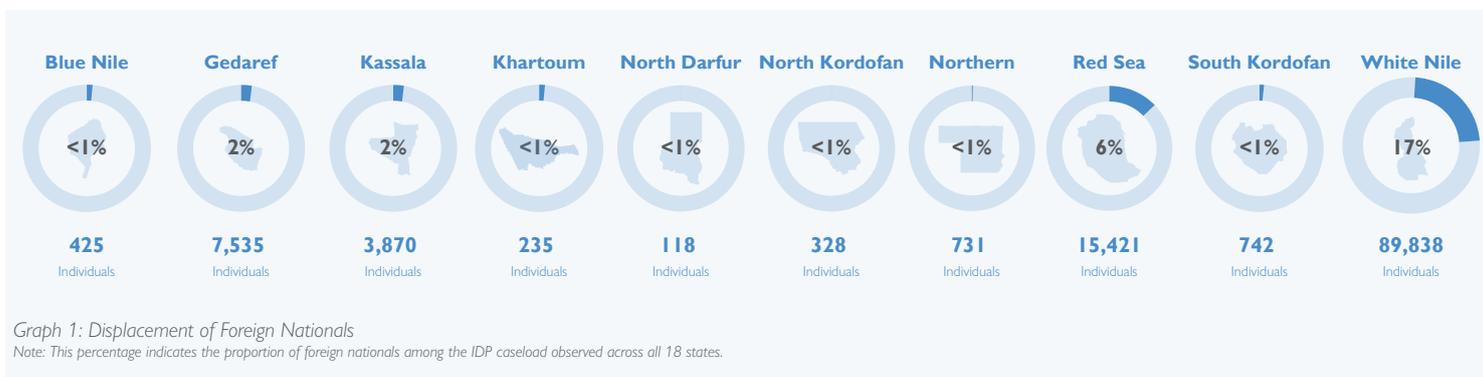

*Total may not be 100 per cent due to rounding.

Displacement of Foreign Nationals within Sudan

From the total reported IDP caseload, field teams indicated that 119,243 individuals were foreign nationals (approximately 2% of total IDPs across Sudan). Most foreign nationals (89,838 IDPs) were located in White Nile state – where they constituted 17 per cent of the IDP caseload in that state. By

comparison, foreign nationals constituted smaller proportions of the observed caseload in descending: Red Sea (6%), Kassala (2%), Gedaref (2%), Khartoum (<1%), South Kordofan (<1%), Blue Nile (<1%), North Kordofan (<1%), Northern (<1%), North Darfur (<1%), and North Darfur (<1%).

Mixed Cross-Border Movement

Since the onset of the conflict on 15 April 2023, DTM has noted substantial mixed cross-border movements involving both Sudanese and foreign nationals. Field teams from affected countries reported that these movements have proved challenging for local communities of arrival. Security concerns, such as military clashes, or the breakdown in law and order in many areas, as well as steep fuel and transportation costs, and environmental events (such as flooding during the rainy season) have all impacted options for both domestic and cross-border travel.
